HIPSTRAW / SCHOOL OF MARKET MASTERY

HIPSTRAW

THE MARKET MASTERY MASTER WORKBOOK

Exploring · Developing · Building · Scaling Markets

A field manual, doctrine registry, operating grammar, research program and execution system for market pioneers, AI agents, Market Architects, partners and customers.

THE CENTRAL IDEA

Markets are not merely found, targeted or advertised to. Under the right conditions, markets can be explored, cultivated, made accessible, activated, organized and scaled through disciplined, repeatable interventions. Hipstraw exists to master those interventions.

WORKBOOK SCOPE	
B2B and B2C · new categories, verticals, geographies and adjacent markets	Version 0.2 · 13 October 2026
Agent-led discovery · human Market Architects · campaigns · partnerships · research	Candidate methods and illustrative designs; not field-certified
Permanent offerings: Programs, Cohorts, Persistent Market Faculty, Capabilities, Experiences, Labs	For concept development, simulation, evaluation and controlled pilots

Prepared as a Hipstraw-specific new workbook, borrowing the source documents' form and operating distinctions, not importing Kozmo invoice methods or asserting their certification.

Editorial rule, provenance and scope

This is an original proposed Hipstraw doctrine, not an established field-tested playbook. The attached Kozmo Invoice Alpha Playbook v0.1 supplies the structural pattern of Position + Stance → Strategy → Play → Line → Move/Gambit → Action, hard rules, compatibility matrices, situation finder, detailed cards and worked cases. Its Addenda A–D supply complementary design patterns for situated mastery and verification; professional instruments and engagement; federation and external invocation; and permanent multi-line offerings. Every Hipstraw Sxx/Pxx/Lxx/Mxx/Gxx/Axx identifier below is newly proposed and local to Hipstraw. No inferred permission or certification transfers from Kozmo.

Hipstraw is strategically and commercially independent of Kozmo and Zotra. It may reuse general Faculty Systems architecture and Blue Salt Research competence-engineering methods without sharing customer data or being subordinated to commercial contracting or project-management product lines.

Status markings

CANDIDATE = specified as an initial working method; LAB = practiced with synthetic or consented evidence; SHADOW = observed in controlled field execution; LIMITED = expressly authorized bounded use; QUALIFIED = demonstrated for a defined situation distribution and environment. None of the following candidates is represented as already qualified.

Revision v0.2 adds the coupled-agent operating architecture: Portfolio → Market → Campaign → Work/Pursuit, with a cross-cutting School of Market Mastery. This architecture is adapted from the Kozmo agent-organization synthesis provided for this update. That synthesis refers to an Addendum E, which was not among the five supplied PDF sources; its specific claims are treated as user-provided design context, not independently verified document content.

Contents and navigation

PART	SECTIONS
PART A / FOUNDATIONS	0 How to use · 1 Grammar · 2 Position system · 3 Market archetypes · 4 Levers and economics · 5 Stances
PART B / GOVERNANCE	6 Hard rules · 7 Authority and participants · 8 Quick picker · 9 Compatibility matrices · 10 Situation finder
PART C / FIELD REPERTOIRE	11 Strategies · 12 Plays · 13 Lines · 14 Moves · 15 Gambits · 16 Actions
PART D / CONSTRUCTED MASTERY	17 Experimental and campaign engine · 18 Artifacts and experiences · 19 Federation and invocation · 20 Human Market Architects
PART E / APPLICATION AND INSTITUTION	21 Worked market cases · 22 Schools, Faculties and six offerings · 23 Programs and Cohorts · 24 Assurance and mastery · 25 Roadmap and upkeep
PART F / AGENT OPERATING ARCHITECTURE	26 Coupled Reviews, multi-agent stewardship, delegation, signals, pursuit, learning and acceptance tests
APPENDICES / WORKSHEETS	A–N Charters, market reviews, experiment and field-mission contracts, agent stewardship, delegation and impact events, acceptance tests

0 How to use this workbook

Use one of four entry points: (1) you see a market with uncertain demand—start at the Position and research stages; (2) you see a market signal, such as strong curiosity but no purchase—go to the Situation Finder; (3) you know the market archetype, channel or region—check the Archetype × Play matrix; (4) you already have a viable market but cannot scale—review the Repeatability and Scale Positions, then select the appropriate expansion Line.

Every card distinguishes: USE WHEN and AVOID WHEN, required evidence, preferred Lines and Moves, accountable owner, and DONE WHEN. A generated campaign, completed outreach task, social impression or reported lead is not automatically market progress. A

buyer's completed purchase, retained usage, dependable supply, verified margin, repeatable acquisition or independently confirmed downstream outcome is stronger evidence.

Reading direction: Review the current Position; identify hard gates; choose a Stance and outcome Strategy; recognize a Play; rehearse and authorize a conditional Line; select permitted Moves; execute accountable Actions; verify; and review again.

1 The Hipstraw market grammar

CONSTRUCT	MEANING	EXAMPLE
Reality	Market behavior, constraints, signals, responses and actual transactions	Interviewee says "interesting"; independently none has bought
Review	Evidence-driven interrogation of what is changing and what matters	Why did 9 prospects agree to demo but only 1 reach a trial?
Position	Persistent, uncertainty-qualified state of a market opportunity	Segment promising, channel weak, offer unproven
Stance	Current professional behavior and experimental posture	Listen-first / Test / Activate / Build / Expand / Protect
Strategy	Market outcome the principal intends to cause	Establish credible first purchases in a defined niche
Play	Recognizable market situation and response family	Active need, inaccessible buyers
Line	Conditional sequence across people, time and channels	Diagnose gatekeeper → test introduction → pilot → proof
Move	Purposeful intervention that changes market position	Secure six trusted introductions
Gambit	Capped, authorized concession or experiment risking value for learning or access	Offer limited-time concierge onboarding to learn adoption barriers
Action	One logged operational effect	Schedule 6 verified interviews; ship test page; capture consent
Mission	Scoped assignment to an agent or human Market Architect	Visit 12 consenting retailers and verify shelf/ordering reality
Instrument	Typed, versioned professional artifact through which work is done	Market Brief, Interview Protocol, Pilot Offer, Partner Proposal
Case	Persistent episode with hypothesis, actors, actions, deadlines and outcome proof	Pilot launch in one city over 7 weeks

Canonical operating loop

Reality → Review → Position → Attention → Action → Outcome → Review again. Exploration, experimentation, campaigns, market building and scaling are different repertoires operating inside this one loop. Review—not chat, dashboard or campaign automation—is the primary interface to reality.

Managerial reading: every accountable Hipstraw manager conducts governed Reviews of a Position or bounded intervention, holds explicit authority and objectives, and selects permitted methods from the repertoire. Specialist execution returns evidence and receipts; it does not automatically rewrite a superior Market or Portfolio Position. See Chapter 26 and Appendices L–N.

1.1 The economic object and the unit of progress

A Market Position exists for a defined offering × audience/archetype × use case × territory/context × route to market × time horizon. A generalized "India market" is usually too broad for a useful Position. A smartphone-assisted home-services acquisition proposition to working parents in a particular Bengaluru neighborhood through local trusted intermediaries is a more actionable unit.

A Portfolio contains candidate Market Positions and their investment decisions. A Market System contains accessible demand, a fit-for-use offer, reliable value delivery, trustworthy acquisition and fulfillment routes, workable economics, enabling institutions and compounding relationships. Hipstraw's purpose is to increase the strength, momentum and optionality of that system, not necessarily to own the end product.

1.2 Four disciplines and handoff conditions

DISCIPLINE	PREFERRED WORK	ADVANCE WHEN
Explore	Observation, opportunity mining, segment mapping, jobs, problems, behavior, local intelligence	At least one specific testable opportunity survives negative evidence
Develop	Audience access, credibility, positioning, offers, channels, partnerships, demand creation	Independent target buyers demonstrate meaningful response or commitment
Build	Pilot delivery, transaction design, ecosystem, supply/fulfillment and recurring market operation	Transactions and service work reliably with verified unit economics
Scale	Repeatability, playbook transfer, multi-region/category/channel expansion, reliability controls	Incremental growth remains healthy in new cohorts, contexts and economics

2 Seven interacting Market Positions

ID / POSITION	MANAGED REALITY	STATE MODEL (CANDIDATE)
MP1 Opportunity Position	Problem intensity, unmet job, substitutes, timing and willingness to change	UNMAPPED → HYPOTHESIZED → SUPPORTED → DISPUTED / REJECTED
MP2 Audience Position	Identifiable archetypes, access, trust, buying roles, segments and contexts	UNKNOWN → ACCESSIBLE → ENGAGED → CONVERTING / INACCESSIBLE
MP3 Offer Position	Proposition, differentiation, real value, risk, purchase friction and product readiness	CONCEPT → PROTOTYPE → TESTED → FITTING / MISFITTING
MP4 Route-to-Market Position	Channels, partnerships, creators, sales motions, distribution and delivery agreements	UNTESTED → PILOTING → REPEATABLE → SATURATED / BLOCKED
MP5 Market System Position	Supply, fulfillment, liquidity, incentives, regulation, community, complementors	FRAGILE → FUNCTIONAL → RELIABLE → RESILIENT / BROKEN
MP6 Economic Position	Contribution margin, acquisition cost, payback, capacity, retention and cash needs	UNMODELED → ASSUMPTION → OBSERVED → VIABLE / NEGATIVE
MP7 Scale and Institutional Position	Transferability, category learning, operating repertoire and portfolio options	NOVEL → REPEATABLE → TRANSFERABLE → SCALED / REGRESSING

These state names are independent axes, not a single compulsory funnel. Opportunity can be well supported while economics are negative; a route can be repeatable while supplier capacity is unreliable. An agent must never silently convert interview enthusiasm into offer–market fit.

Ownership clarification (v0.2): MP1–MP7 are seven interdependent lenses of one explicitly bounded Market Position, not seven mandatory independent agent instances. The accountable Market Manager owns its consolidated version. Research, Campaign, Partnership and Market-System specialists may maintain subordinate assessments or Cases and submit attributed Impact Signals; only a governed Market Review changes the consolidated Position. Portfolio aggregation has a distinct steward, population and evidence standard.

2.1 Market Position document

- Identity and boundary: principal; product or proposition; audience archetype; territory; channel; use context; version and as-of time.
- Thesis and counter-thesis: observed demand, suspected cause, substitutes, reasons market may not exist and credible alternative explanations.
- Evidence: first-party transaction records; contextual observation; interviews; independent source/provenance; representative sample limits; conflicting evidence.
- Operating state: each of seven Positions; maturity and momentum; pending hypotheses; confidence/coverage and material unknowns.
- Opportunity and exposure: likely value, direct and ecosystem economics, trust issues, regulatory constraints, capacity, total cost and lost optionality.

- Attention and disposition: Ambient / Brief / Watch / Prompt / Alert / Request; EXPLORE / TEST / ACTIVATE / BUILD / SCALE / REFRAME / PARK / STOP.
- Outcome path: selected Strategy; approved Line, experiment and human Mission; owners, deadlines, safe cutoffs, promised evidence and verified result.

2.2 Position quadrants and momentum

Use a two-axis Opportunity–Readiness quadrant to assist attention, never as a substitute for separate evidence. High Opportunity / High Readiness: candidate accelerate. High Opportunity / Low Readiness: build access, trust, supply or enabling infrastructure. Low Opportunity / High Readiness: efficient test or redeploy. Low / Low: park or stop. Independently score Confidence, Economic Quality, Repeatability, Conduct Risk and Market Momentum; avoid a universal composite score that can conceal a legal or unit-economics failure.

3 Archetypes of market pioneering

ARCHETYPE	MARKET REALITY	TYPICAL FIRST PLAY
A01 Unserved demand pocket	Need exists but access, recognition or affordability fails	Deep observation, distribution bridge
A02 New category / behavior	Need must be named, understood and normalized	Education, demonstration, community proof
A03 Mature market displacement	Customers already buy substitutes	Switching wedge, economic proof, credible comparison
A04 Horizontal product → vertical niche	Generic product does not feel industry-specific	Vertical workflow, roles, evidence, references
A05 Regional or cross-border entry	Context and institutions differ	Local adaptation, trusted partners, compliance
A06 Product adjacency expansion	Incumbent base suggests new jobs or buyer roles	Adjacent job mapping, bundle experiment
A07 Two-sided or multi-sided market	Demand depends on complementary supply/liquidity	Seeding, matching and balanced incentives
A08 Fragmented local services	Scattered providers, low trust and quality variance	Human field network, assurance and booking
A09 Creator / community-led niche	Trust and identity drive discovery	Community research, authentic co-creation
A10 Enterprise design-partner market	Complex roles and integration requirements	Executive sponsorship, co-design and proof
A11 Channel-led / embedded distribution	Another principal owns access and attention	Joint value proposition, partner enablement
A12 Distressed or disrupted market	Structural shock changes choices quickly	Risk-sensitive opportunity review
A13 Supply-constrained market	Interest exists; ability to fulfill lags	Capacity partnerships, managed rollout
A14 Public/institutional ecosystem	Regulation and institutional procurement matter	Ethical stakeholder map, compliant procurements
A15 Micro-market / neighborhood	Local dense behavioral clusters	Street research, micro-events, local nodes
A16 Reactivation / second-life market	Past users went dormant or behavior shifted	Reason-for-churn discovery, respectful re-entry

3.1 Search-space geometry

Every market exploration declares axes instead of indiscriminately generating lists: end-user job; buyer identity; vertical; firmographic or demographic archetype; region and culture; distribution route; substitute and competitor; buying trigger; regulatory exposure; price band; complementary supply; timing; and adjacency to existing capacity. Candidate territories become explicit hypotheses and are ranked by decision value, not estimated TAM alone.

4 Market levers, economics and evidence

LEVER	TESTABLE QUESTION
Need clarity	Can buyers articulate a problem they will act on?
Problem intensity	Urgency, cost of inaction, frequency, budget and triggers
Access	Reaching qualified decision makers or end users with permission

Trust and credibility	Reputation, proof, local legitimacy, safety and risk reversal
Attention and education	Awareness and clear understanding of a new possibility
Offer and differentiation	Specific value promise versus actual alternatives
Trial and adoption friction	Time, migration, onboarding, habit and complexity
Value delivery	Product/service outcomes after the sale
Channel productivity	Reach × qualified response × conversion without inflated metrics
Supply and liquidity	Coverage, service capacity, match speed and reliability
Price and unit economics	Net revenue, gross margin, CAC, service cost, payback and cash
Retention and referrals	Repeat behavior, satisfaction, earned network effects
Partnership and ecosystem	Complementors, local advocates, channel incentives
Optionality	Ability to vary offer, segment, channel, territory or timing

Use cohorts rather than pooled vanity totals: source-specific eligible exposure → consented/qualified engagement → meaningful activation → first verified value → paid or committed transaction → repeat / retention → net contribution. Attribution separates randomized lift where feasible, quasi-experimental matched baselines, directional evidence and mere correlation.

False equivalences to prevent

A lead is not demand. A survey answer is not a purchase. A signed letter of intent is not recognized revenue. A creator's audience is not addressable active buyers. High conversion on subsidized supply is not healthy unit economics. High paid spend with positive revenue is not automatically profitable expansion.

4.1 Illustrative economic worksheet

FIELD	B2B PILOT EXAMPLE (FICTIONAL)	B2C LOCAL PILOT EXAMPLE (FICTIONAL)
Market unit	20 design-partner accounts in 1 SaaS vertical	300 eligible households in 2 neighborhoods
Value signal	Paid prototype deposits and active usage	Completed repeatable booked service
Sales yield	Stage-to-stage cohort conversion, deal margin	Verified bookings, refunds, contribution after provider costs
Cost of discovery	Researcher time, demos, interviews and specialist review	Market Architect time, travel, participation and event costs
Decision gate	Repeatable use case + plausible payback	Repeat purchase + safe supply and positive contribution

5 Eight Stances

STANCE	BEHAVIOR	SELECT WHEN / PROHIBITION
Listen	Suspends premature persuasion; asks open, situated questions	Unclear need, high ignorance; Never claim a market exists from politeness
Scout	Searches for signal sources and alternative hypotheses	New geography or archetype; Never substitute desk research for consequential field validation
Probe	Runs a bounded test with minimal irreversible commitment	Promising but unverified hypothesis; Never over-interpret small or biased tests
Co-create	Develops offer and value with consenting participants	Design partners or community-led need; Never transfer unpaid work unfairly or misrepresent terms
Activate	Asks for a meaningful low-risk conversion or commitment	Evidence supports relevance and channel access; Never conceal commercial intent or consent conditions

Build	Prioritizes reliable fulfillment, trust and economic foundations	Initial transactions demonstrate potential; Never scale demand beyond safe supply
Expand	Replicates validated patterns with gates and holdouts	Strong unit economics in proven niche; Never assume transferability to new cultures/channels
Protect / Pause	Preserves safety, money, reputation and options	Compliance issue, harmful economics, broken supply; Never keep campaigns running simply to meet activity quotas

6 Twenty hard rules for ethical, reliable market pioneering

#	NON-NEGOTIABLE RULE	REQUIRED BEHAVIOR
01	A market hypothesis is not a fact	Report confidence, sample, source and counterevidence.
02	Market research is not permission to market	Respect consent, communications rules and platform terms.
03	A lead is not a customer	Track demonstrated need, buying authority, conversion and fulfilled value separately.
04	No fabricated demand, reviews, personas or testimonials	Synthetic worlds and generated data are explicitly labeled.
05	No manufactured social proof or false scarcity	Prohibit invented waitlists, endorsements, deadlines and comparative claims.
06	No manipulation or exploitative targeting	Protect vulnerable people and avoid deceptive behavior-shaping.
07	Never ignore local law and institutional context	Resolve advertising, privacy, labor, consumer, sector and solicitation requirements.
08	Field researchers obtain appropriate consent	Do not covertly record, pressure or collect unnecessary personal data.
09	No uncontrolled outreach across channels	Honor opt-outs; prevent duplicate chasing across human and agent workers.
10	Evidence missing is UNKNOWN	Do not label an audience uninterested simply because an intermediary failed.
11	Human missions have safe boundaries	No unsafe venue, uncompensated hazards, protected-data overcollection or ambiguous authority.
12	Different principals require confidentiality barriers	Do not expose a client's private market thesis, prospect list or bids to competitors.
13	Investment follows stage gates	Spend, discount, supply commitment and launch limits are explicitly approved.
14	Every Gambit has capped loss and a fallback	Subsidies, guarantees, exclusivity and free labor must be priced and time-bound.
15	Do not scale broken fulfillment	Pause acquisition when safety, quality, availability or service economics fail.
16	Attribution must be truthful	Separate pipeline, bookings, realized revenue, contribution and incremental uplift.
17	No conversion at the expense of customer value	Mis-selling, aggressive pressure and churn-inducing acquisition disqualify success.
18	Authorized principals own consequential decisions	Hipstraw may recommend outside its authority but may not bind the client.
19	Revocation and withdrawal halt affected activity	Revoke outreach, data access or representative authority promptly.
20	One owner and one verifiable closure per mission/case	Every live effort has a decision point, named accountabilities and outcome proof.

7 Decision rights, actors and delegated agency

DECISION OR EFFECT	HIPSTRAW AGENT / MARKET ARCHITECT	PRINCIPAL / SPECIALIST
Desk research and hypotheses	Conduct within approved data rights	Sponsor owns interpretation of material commitments
Interview and consenting survey	Run approved protocol; identify employer/intent	Research steward approves sensitive methods
Public positioning and marketing claims	Prepare, test and flag risks	Brand owner / compliance approves material statements
Experimental message or campaign launch	Execute only under channel, budget and eligibility rules	Campaign owner sets budget/opt-in and brand controls
Discount, credit or guarantee	Model and prepare a capped proposal	Commercial authority approves offers and concessions
Formal partnership and distribution terms	Identify, diligence and negotiate within mandates	Authorized principal signs exclusivity and commitments
Human hiring, pay and mission safety	Assign under approved contract and policy	Hipstraw operations + local legal/labor responsibility
Customer or participant data reuse	Use only specified rights, retention and consent	Data steward approves cross-client or research reuse

Regional market launch and scale spend	Recommend with gate evidence	Principal sponsor / investment authority authorizes
Outcome certification and public benchmarks	Collect and analyze traceable evidence	Independent evaluation owner approves result statements

Action authority attaches to a named principal, current policy version, capability maturity, scope, spend and recipient; visible controls do not confer it. Hipstraw owns its own agents and Market Architects operationally, but cannot convert its own employment control into authority over a client's brand, customer commitments or funds.

Agent-organization clarification (v0.2): each management level runs its own eight-step Review-to-Action selection. Portfolio leaders choose population objectives and allocations; Market Managers choose position-improvement Strategies; Campaign Managers select eligible Lines within a scoped assignment; Work Agents perform bounded capabilities. No top-down objective automatically delegates spending, contact, legal or platform authority.

8 The eight-step quick picker

STEP	QUESTION	IF UNCERTAIN
1 REVIEW	What changed in the actual market?	Separate observation from interpretation; identify freshest evidence.
2 POSITION	Which of MP1–MP7 is weak or changing?	Name the specific market unit and material unknowns.
3 BLOCK	Any rights, safety, consent, authority or unit-economics stop?	Do not proceed with consequential action.
4 STANCE	Listen, Scout, Probe, Co-create, Activate, Build, Expand or Protect?	Prefer minimal irreversible commitment.
5 STRATEGY	Which market outcome is worth pursuing now?	Specify buyer behavior and value, not just activity.
6 PLAY / LINE	Which recognized situation and conditional protocol fit?	If no qualified Line fits, use supervised lab or human decision.
7 MOVE / MISSION	Which bounded intervention advances the Position?	Choose recipient, channel, rigor, cost and stop rules.
8 VERIFY / LEARN	Did intended customer and economic outcomes occur?	Record counterfactual, limits, next review, lesson and disposition.

9 Compatibility and selection matrices

9.1 Position × preferred Stance

POSITION SIGNAL	DEFAULT STANCE	TYPICAL NEXT CHOICE
Need uncertain, anecdotal enthusiasm	Listen	Problem interviews plus disconfirming sample
Target exists but difficult to locate	Scout	Access map and trusted-intermediary test
Strong claim, no observed behavior	Probe	Low-cost behavioral commitment test
Buyer wants to shape early offer	Co-create	Time-bound design partner with mutual terms
Offer validated, first purchases lacking	Activate	Conversion and objection test
Transactions real; quality unstable	Build	Fulfillment, handoff and trust reliability
Economics repeat in one segment	Expand	New-cohort validation and scale gate
Consent breach, negative contribution or unsafe fieldwork	Protect / Pause	Stop affected channel; remediate and review

9.2 Market stage × eligible Play families

STAGE	PRIMARY PLAYS	AVOID

Explore	P01–P08; P27	Mass activation and large media spend
Develop	P09–P18; P29	Scaling before credible customer response
Build	P19–P24; P30	Volume promises beyond verifiable capacity
Scale	P25–P28; P31–P32	Uncontrolled copying into unlike markets
Any stage	P06, P08, P23, P26, P32	Ignoring legal/ethical/authority gates

9.3 Archetype × highest-value intervention

ARCHETYPE	PRIORITY PLAYS	TYPICAL RISK
A01 / A15 local unmet demand	P03, P07, P13, P20	Small visible sample does not represent region
A02 new category	P02, P12, P14	Curiosity is mistaken for adoption
A03 displacement	P10, P15, P17	Switching cost suppressed
A04 vertical niche	P04, P11, P18	Custom solution cannot repeat
A05 regional entry	P05, P13, P21, P27	Localization and legal mismatch
A06 adjacency	P04, P10, P28	Existing customers assumed to want adjacency
A07 multi-sided	P08, P19, P22	One-sided subsidy conceals liquidity weakness
A08 fragmented services	P07, P19, P20	Provider verification / safety
A09 community-led	P12, P16, P29	Extractive participation or false advocacy
A10 enterprise partners	P11, P17, P24	No economic buyer / hidden technical friction
A11 embedded channel	P13, P21, P24	Partner dependence, weak attribution
A12 disrupted market	P01, P06, P32	Exploiting crisis or stale conditions
A13 supply constrained	P19, P22, P23	Harmful demand generation
A14 institutional	P05, P21, P26	Procurement and legal failure
A16 reactivation	P02, P15, P18	Wrong churn theory; nuisance outreach

9.4 Evidence rigor × decision consequence

DECISION CLASS	REQUIRED DILIGENCE	DECISION / APPROVAL
Discovery question, desk hypothesis	Trace sources; identify biases and freshness	Research lead; no public factual certainty
Interview or small consented pilot	Protocol, recruitment rationale, negative cases	Study owner; privacy and local safety
Paid channel or price experiment	Baseline, attribution and cost controls	Campaign owner and budget approver
Exclusive partner or supply guarantee	Counterparty diligence, legal review, financial sensitivity	Named signatory and contingency review
Scaled geographic expansion	Held-out cohorts, supply capacity, reliable contribution and stress tests	Sponsor / investment authority, phased release
Public scientific market/competitor rating	Documented evaluation, disclosure and conflict review	Independent assurance / editorial governance

9.5 Signal × first Move

OBSERVABLE SIGNAL	RECOMMENDED FIRST MOVE
“Interesting idea” but no action	M10 Behavioral Commitment Test
Interviewees contradict desk thesis	M03 Disconfirming Probe

Audience cannot be identified	M06 Audience Source Mapping
Partner introduces many unqualified leads	M20 Channel Qualification Audit
Strong sign-ups but no activation	M30 Friction Observation
Strong trial, weak paid conversion	M33 Price/Value Exchange Probe
Strong demand, low fulfillment	M40 Capacity/Service Reliability Gate
High CAC masked by promotions	M43 True Contribution Rebuild
One city strong, next city weak	M50 Transferability Test
Fast acquisition, severe early churn	M45 Retention/Trust Diagnosis
Sensitive audience or unsafe practice	M55 Pause/Remediate Intervention
Local influencer reach with no verified buyers	M26 Creator Audience Fit Test

9.6 Channel × experiment and evidence

CHANNEL	APPROPRIATE PROBE	STRONGER PROOF
Executive outbound	Consent/opt-out-compliant problem approach with audited sample	Qualified sponsored meeting and documented buying trigger
Partner / platform embed	Joint workflow prototype and shared qualification	Incremental referred users who activate and remain
Search / paid media	Bounded creative–offer test with holdout where feasible	Incremental paid acquisition and sound payback
Neighborhood ambassador	Consented field interviews and live demonstration	Real bookings, local referrals, quality proof
Creator / community	Transparent authentic community experiment	Retained participation and attributable, non-subsidized demand
WhatsApp / messaging	Permission-based information or assistance experience	Opt-in, fulfilled transactions, compliant follow-up
Events / demos	Segment-specific event with follow-through	Verified qualified discussions, trial and purchase
Industry alliance / association	Member discovery and jointly delivered educational event	Qualified participating members with decision autonomy

9.7 Scale stage × evidence gate

GATE	REQUIRED EVIDENCE	STOP / FALLBACK
G0: Opportunity	Traceable need signals + contrary cases	Reframe or park
G1: Behavioral demand	Representative enough commitment beyond declared intent	Broaden sample or modify offer
G2: Delivery	Proof of paid, completed user value and safe supply	Fix fulfillment before promotion
G3: Repeatability	Two or more independent cohort/period checks, credible contribution	Limit spend; diagnose channel mix
G4: Transfer	New segment/region held-out testing, local compliance and owner	Pilot new market rather than mass launch
G5: Scaled operation	Capacity, quality, incremental economics, retention and counterfactual	Throttle, return to G2/G3

9.8 Mission type × Market Architect capabilities

MISSION	HUMAN SPECIALIZATION	QUALITY CONTROL
Intercept / ethnographic observation	Researcher, interviewer, local-language navigator	Consented method; sampling log; contextual notes
Retail and local trade audit	Field auditor, category specialist	Timestamped allowed photos; independent spot checks
Demand interview and concept co-design	Moderator, product strategist	Neutral probes; raw coded evidence and disagreement

Creator and community activation	Local producer, influencer manager, community facilitator	Authenticity, disclosure and engagement quality
Channel partner recruitment	Business developer, vertical operator	Validated partner capacity and contract boundaries
Pop-up events and demonstrations	Event operator, videographer, lead qualifier	Consent, safety, documented participant outcomes
Service-supply recruitment	Vendor onboarding and quality specialist	Credential checks, pricing, safety and response reliability
Localized content and video	Copywriter, designer, producer	Rights and accuracy review, no fabricated endorsements
Mystery-shopping / service audit	Authorized service tester	Lawful context; ethics; no impersonation where prohibited

9.9 Offering × commercial buyer and delivery asset

PRODUCT LINE	BUYER	ECONOMIC UNIT
Market Exploration / Development Program	Founder, growth leader, strategy executive	Bounded mission/experiment, defined outcome
Pioneer Cohort	Founders, enterprises, ecosystem members	Participation, sponsorship, research learning
Persistent Market Faculty	Growth/market development leader or investor operating group	Scoped recurring mandate + verified outcomes
Invocable Market Specialist Capability	Agent platform, ISV, consultancy	Metered assessment / research / managed case
Widgets and owned experiences	Product/team/community platform	Licence, workspace or program interface
Labs, benchmark and assurance	Product companies, VC/PE, AI labs, strategy group	Evaluation, field study and professional research

10 Situation finder

WHAT YOU SEE	PLAY	FIRST MOVE
Many claim need; none take next step	P02 Need Claim Versus Behavior	M10 Commitment Test
A market looks large but audience is diffuse	P01 Territory Prioritization	M06 Audience Mapping
Customer workarounds are visible	P03 Unmet Job Discovery	M01 Contextual Observation
Same product attracts unrelated segments	P04 Vertical Wedge Selection	M09 Archetype Segmentation
Regional customer language differs	P05 Local Context Translation	M08 Local Interpreter Mission
Sudden market event creates interest	P06 Trigger and Timing Window	M12 Trigger Verification
Stores/partners refuse access	P07 Street/Trade Access Bridge	M18 Trusted Introduction
Supply and demand each wait for other	P08 Two-Sided Seed	M39 Liquidity Seeding
Offer is too hard to explain	P09 Positioning Comprehension	M22 Comprehension Test
Current customers of incumbent dissatisfied	P10 Switching Wedge	M15 Alternative Mapping
Enterprise buyer cannot see ROI	P11 Design Partner Proof	M28 Outcome Prototype
Educational content admired but no usage	P12 Category Education to Action	M10 Commitment Test
Resellers promise distribution but no access	P13 Channel Access Validation	M20 Partner Audit
A local event gets crowd but few buyers	P14 Live Demand Event	M35 Post-Event Qualification
Trial users do not pay	P15 Trial-to-Paid Conversion	M33 Price Probe
Community has attention but no trust to transact	P16 Community Trust Loop	M27 Authentic Partner Mission
Sales pipeline stalls on committee decisions	P17 Consensus and Buying Roles	M24 Decision Map
Repeated product objections surface	P18 Offer Fit Reframe	M29 Objection Taxonomy

High demand with unreliable providers	P19 Supply/Delivery Balancing	M40 Capacity Gate
People fear local-service quality	P20 Trust-and-Quality Assurance	M41 Assured Pilot
Channel partner asks exclusive territory	P21 Partner Economics and Governance	M42 Non-exclusive Test
Bookings fail due to missing supply	P22 Supply Activation	M38 Provider Readiness Audit
Campaign conversions are inflated by incentives	P23 Margin Integrity	M43 Contribution Rebuild
Offering works but onboarding breaks	P24 Activation Reliability	M30 Friction Observation
Growing spend generates declining returns	P25 Channel Saturation and Renewal	M47 Marginal Return Test
User group requires regulated acquisition	P26 Permission and Compliance Review	M55 Stop and Correct
Next city’s performance collapses	P27 Geography Transfer	M50 Transferability Test
Existing buyers ask for adjacent use case	P28 Adjacency Validation	M13 Adjacent Job Probe
Influencer traffic is large but not qualified	P29 Creator/Community Fit	M26 Creator Fit Test
High-value accounts need hand-built solution	P30 First Market System Build	M36 Manual Fulfillment Proof
Market repeats but margin deteriorates	P31 Scale System Repair	M43 Contribution Rebuild
Hypothesis keeps failing / environment changes	P32 Pause, Reframe or Retire	M55 Pause/Remediate

11 Strategy catalogue — outcome archetypes

Strategies describe outcomes, not communication style. One Strategy may be pursued in a Listen or Activate Stance as the evidence develops; Stance can change by episode without rewriting the higher-order goal. IDs H-S01 through H-S16 are proposed Hipstraw identifiers.

H-S01 Map the actual market | *STRATEGY / CANDIDATE*

PURPOSE Discover who experiences the problem and how the system currently works
USE WHEN Uncertain segment, actors or substitutes
AVOID WHEN A credible market and decision unit is already mapped
REQUIRED EVIDENCE / CONDITIONS Observation sources, explicit scope, contradictory cases
PREFERRED LINE / MOVES L01 Territory Reconnaissance → M01/M06
WHO DECIDES / EXECUTES Research Lead; sponsor reviews market boundary
DONE WHEN / VERIFICATION Actor and job map with known/unknown and source limitations
WORKED ILLUSTRATION Interview ten buyers and two supply intermediaries in a synthetic B2B SaaS vertical
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S02 Disconfirm a seductive thesis | *STRATEGY / CANDIDATE*

PURPOSE Find faster evidence that the opportunity may be wrong
USE WHEN High confidence from anecdote or founder conviction
AVOID WHEN A stop deadline makes further sampling harmful
REQUIRED EVIDENCE / CONDITIONS Alternative hypotheses and disconfirming interview protocol
PREFERRED LINE / MOVES L02 Disconfirming Discovery → M03/M10
WHO DECIDES / EXECUTES Research Steward; sponsor owns stop
DONE WHEN / VERIFICATION Decision-relevant hypothesis is narrowed, rejected or survives a genuine test
WORKED ILLUSTRATION Probe buyers who explicitly chose to retain the incumbent
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S03 Prioritize a market wedge | *STRATEGY / CANDIDATE*

PURPOSE Select a narrow, reachable, valuable initial market
USE WHEN Broad TAM with scarce capacity
AVOID WHEN Wedge sacrifices a proven strategic obligation
REQUIRED EVIDENCE / CONDITIONS Archetype map, reach, need, economics and comparative cost
PREFERRED LINE / MOVES L03 Wedge Selection → M09/M13
WHO DECIDES / EXECUTES Market Faculty Manager and sponsor
DONE WHEN / VERIFICATION One testable market unit and a bounded second-best alternative
WORKED ILLUSTRATION Start with 50 specialty logistics operators rather than “all SMBs”
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S04 Establish trusted market access | *STRATEGY / CANDIDATE*

PURPOSE Reach the right people via credible, lawful paths
USE WHEN Audience hidden behind local or institutional gates
AVOID WHEN Access requires deception or unlawful contact
REQUIRED EVIDENCE / CONDITIONS Permission, channel evidence, gatekeeper map, reciprocal benefit
PREFERRED LINE / MOVES L04 Access Bridge → M18/M20
WHO DECIDES / EXECUTES Business development owner
DONE WHEN / VERIFICATION Qualified, consenting conversations or introductions occur
WORKED ILLUSTRATION Use an industry operator as paid local Market Architect
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S05 Make the proposition intelligible | *STRATEGY / CANDIDATE*

PURPOSE Translate a latent job into compelling, accurate language
USE WHEN Interest but confusion or poor understanding
AVOID WHEN Claim cannot be substantiated
REQUIRED EVIDENCE / CONDITIONS User vocabulary, substitute comparison, comprehension test
PREFERRED LINE / MOVES L05 Message and Offer Probe → M22
WHO DECIDES / EXECUTES Brand/product sponsor approves claim
DONE WHEN / VERIFICATION Users can restate what changes and why
WORKED ILLUSTRATION Replace “AI-first vertical platform” with a concrete work outcome
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S06 Create a credible first commitment | *STRATEGY / CANDIDATE*

PURPOSE Turn interest into meaningful, low-friction behavior
USE WHEN Qualified attention without evidence of real demand
AVOID WHEN Delivery is unsafe or offer terms unsupported
REQUIRED EVIDENCE / CONDITIONS Valid offer, buyer role, capacity and consent
PREFERRED LINE / MOVES L06 Behavioral Test → M10/M33
WHO DECIDES / EXECUTES Commercial principal approves incentive and spend
DONE WHEN / VERIFICATION Deposit, appointment, real trial use, paid pilot or equivalent verified intent
WORKED ILLUSTRATION Request a paid design-partner slot, not another like
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S07 Recruit market co-builders | *STRATEGY / CANDIDATE*

PURPOSE Create value with a small set of committed partners
USE WHEN Product requires situated co-design
AVOID WHEN Participants lack consent or receive no fair value
REQUIRED EVIDENCE / CONDITIONS Sponsor, design-partner terms, expected mutual contribution
PREFERRED LINE / MOVES L07 Design Partner Loop → M28/M37
WHO DECIDES / EXECUTES Product sponsor; partnership owner
DONE WHEN / VERIFICATION Partner contributes real use and supplies evaluated outcome evidence
WORKED ILLUSTRATION Two buyers co-design the workflow and test real usage
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S08 Unlock channel leverage | *STRATEGY / CANDIDATE*

PURPOSE Establish productive third-party access without dependency traps
USE WHEN Trusted distributors or platforms reach target audience
AVOID WHEN Partner provides only vanity introductions
REQUIRED EVIDENCE / CONDITIONS Partner ability, economics, conflict and access permissions
PREFERRED LINE / MOVES L08 Channel Validation → M20/M42
WHO DECIDES / EXECUTES Partnership lead; signatory for terms
DONE WHEN / VERIFICATION Partner cohort converts and retains with viable economics
WORKED ILLUSTRATION Test one trade association before a national agreement
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S09 Build a viable transaction | *STRATEGY / CANDIDATE*

PURPOSE Make trial, fulfillment, payment and support work together
USE WHEN Demand exists but value delivery uncertain
AVOID WHEN Safety, assurance or economics prohibit launch
REQUIRED EVIDENCE / CONDITIONS Real service and support capacity; legal review as applicable
PREFERRED LINE / MOVES L09 First Transaction Build → M36/M41
WHO DECIDES / EXECUTES Principal operating owner
DONE WHEN / VERIFICATION End-to-end transaction settles with verified customer value
WORKED ILLUSTRATION Book and fulfill one home-service order with verified provider
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S10 Create repeatable acquisition | *STRATEGY / CANDIDATE*

PURPOSE Develop a predictable and responsible market-entry motion
USE WHEN Two successful pilot cohorts with stable supply
AVOID WHEN Acquisition economics negative or trust declining
REQUIRED EVIDENCE / CONDITIONS Segmented funnel, incremental costs, cohort data
PREFERRED LINE / MOVES L10 Repeatable Acquisition → M46/M47
WHO DECIDES / EXECUTES Growth owner and finance partner
DONE WHEN / VERIFICATION Incremental new customers convert at sustainable contribution
WORKED ILLUSTRATION Repeat the same niche offer in a second cohort
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S11 Develop market liquidity | *STRATEGY / CANDIDATE*

PURPOSE Increase effective matching and participation on all required sides
USE WHEN Supply/demand cold start
AVOID WHEN Subsidy masks permanent negative economics
REQUIRED EVIDENCE / CONDITIONS Two-sided capacity, fulfillment and participation incentives
PREFERRED LINE / MOVES L11 Supply–Demand Balance → M38/M39
WHO DECIDES / EXECUTES Marketplace owner
DONE WHEN / VERIFICATION Matching time, fill rate and repeat use meet stated gates
WORKED ILLUSTRATION Recruit five reliable local providers before promoting 200 bookings
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S12 Protect unit economics | *STRATEGY / CANDIDATE*

PURPOSE Prevent expansion that destroys value
USE WHEN Growth rates and incentives conceal costs
AVOID WHEN No reliable cost or fulfillment attribution yet
REQUIRED EVIDENCE / CONDITIONS Direct and allocated cost, refunds, discounts and marginal CAC
PREFERRED LINE / MOVES L12 Margin and Payback Gate → M43/M44
WHO DECIDES / EXECUTES Finance/economic sponsor
DONE WHEN / VERIFICATION Net incremental contribution and cash use are defensible
WORKED ILLUSTRATION Stop a city launch after delivery overruns exceed margin
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S13 Establish regional legitimacy | *STRATEGY / CANDIDATE*

PURPOSE Adapt route, offer and operations to a real place
USE WHEN Regional entry differs in language, norms and policy
AVOID WHEN Localization requires harmful cultural stereotyping
REQUIRED EVIDENCE / CONDITIONS Local research, counsel, partners and field evidence
PREFERRED LINE / MOVES L13 Localized Entry → M08/M51
WHO DECIDES / EXECUTES Regional owner
DONE WHEN / VERIFICATION Local participants validate relevance, fulfillment and trust
WORKED ILLUSTRATION Partner with bilingual neighborhood organizers in Bengaluru
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S14 Compound partnerships and community | *STRATEGY / CANDIDATE*

PURPOSE Make mutually valuable institutional relationships durable
USE WHEN Trust and repeat participation are key
AVOID WHEN Extractive creator or community engagement
REQUIRED EVIDENCE / CONDITIONS Benefit allocation, disclosures, partner expectations
PREFERRED LINE / MOVES L14 Community and Partner Loop → M27/M52
WHO DECIDES / EXECUTES Partner/community steward
DONE WHEN / VERIFICATION Retention, referrals and partner economics persist
WORKED ILLUSTRATION Create a community event that provides useful independent education
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S15 Expand to adjacent markets | *STRATEGY / CANDIDATE*

PURPOSE Transfer a validated pattern to new archetypes, contexts or geography
USE WHEN Core niche has proven economics
AVOID WHEN Transfer assumptions untested or core deteriorating
REQUIRED EVIDENCE / CONDITIONS New-market holdouts, supply, unit economics and compliance
PREFERRED LINE / MOVES L15 Transfer and Scale → M50/M53
WHO DECIDES / EXECUTES Market portfolio sponsor
DONE WHEN / VERIFICATION New segment performs after its own evaluation gate
WORKED ILLUSTRATION Test nearby vertical before opening three countries
PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

H-S16 Preserve optionality and exit intelligently | *STRATEGY / CANDIDATE*

PURPOSE Avoid sunk-cost escalation; park, pivot or retire weak options

USE WHEN Costs rise faster than learning; thesis invalidated

AVOID WHEN Waiting exposes people or creates binding obligations

REQUIRED EVIDENCE / CONDITIONS Decision cutoff, salvageable assets, alternate thesis and transition plan

PREFERRED LINE / MOVES L16 Reframe or Stop → M54/M55

WHO DECIDES / EXECUTES Sponsor / investment authority

DONE WHEN / VERIFICATION Spending stopped or reprioritized with traceable learning and graceful exit

WORKED ILLUSTRATION Retire paid acquisition in a failed micro-market but preserve research'

PIONEER'S NOTE Strategy success must be verified through changed market behavior or a higher-quality decision, not tasks completed.

12 Play catalogue — recognize the situation

The 32 candidate Plays below correspond to the 32 situations in §10. A Play is a decision pattern tied to a market reality; it is not a fixed marketing automation. Each can run several Lines depending on customer authority, stage, archetype and evidence. “When” and “Avoid” conditions are initial proposals, to be narrowed through trials.

H-P01 Territory Prioritization | *PLAY / CANDIDATE*

PURPOSE Choose a small territory from broad plausible demand
USE WHEN Many possible industries or regions compete for attention
AVOID WHEN Segment economics and access are not comparable
REQUIRED EVIDENCE / CONDITIONS Territory map, jobs, feasible reach, substitutes and uncertainties
PREFERRED LINE / MOVES L01 Recon → L03 Wedge; M06/M09
WHO DECIDES / EXECUTES Faculty Manager + sponsor
DONE WHEN / VERIFICATION Explicit ranked wedge, excluded alternatives, testable reason
WORKED ILLUSTRATION Compare Series B SaaS revenue-ops versus all software firms
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P02 Need Claim Versus Behavior | *PLAY / CANDIDATE*

PURPOSE Separate reported interest from costly behavior
USE WHEN Polite interviews or content enthusiasm
AVOID WHEN No realistic opportunity for the user to act
REQUIRED EVIDENCE / CONDITIONS Buyer job, compliant trial, commitment and realistic alternatives
PREFERRED LINE / MOVES L02 Disconfirm → L06 Behavioral Test
WHO DECIDES / EXECUTES Research Lead
DONE WHEN / VERIFICATION At least one real action threshold and negative-case interpretation
WORKED ILLUSTRATION Ask for a live trial on current data after conceptual approval
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P03 Unmet Job Discovery | *PLAY / CANDIDATE*

PURPOSE Reveal undeserved workarounds and persistent jobs
USE WHEN Repeated manual improvisation or workaround use
AVOID WHEN Research could expose confidential or intimate participant data
REQUIRED EVIDENCE / CONDITIONS Consent, site context, independent observations
PREFERRED LINE / MOVES L01 Recon → L02 Disconfirm; M01/M04
WHO DECIDES / EXECUTES Field Research Lead
DONE WHEN / VERIFICATION Problem mechanisms and willingness-to-change constraints understood
WORKED ILLUSTRATION Observe independent caterers reconciling fragmented lunch orders
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P04 Vertical Wedge Selection | *PLAY / CANDIDATE*

PURPOSE Make one segment more precise and useful than a generic pitch
USE WHEN Several markets express generic demand
AVOID WHEN No unique segment-specific difference survives test
REQUIRED EVIDENCE / CONDITIONS Buyer archetypes, workflow economics, vertical language
PREFERRED LINE / MOVES L03 Wedge → L05 Message Probe
WHO DECIDES / EXECUTES Product/market sponsor
DONE WHEN / VERIFICATION Vertical offer is chosen and at least one segment engages meaningfully
WORKED ILLUSTRATION A contract review tool for healthcare staffing teams
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P05 Local Context Translation | *PLAY / CANDIDATE*

PURPOSE Avoid transplanting assumptions unchanged across places
USE WHEN Same global offer meets unfamiliar context
AVOID WHEN Law or safe field access cannot be supported
REQUIRED EVIDENCE / CONDITIONS Local language and trade structure; counsel if material
PREFERRED LINE / MOVES L13 Local Entry; M08/M51
WHO DECIDES / EXECUTES Regional Owner
DONE WHEN / VERIFICATION Local proposition and delivery format survive a field test
WORKED ILLUSTRATION Adapt booking, payment and support formats for one Indian city
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P06 Trigger and Timing Window | *PLAY / CANDIDATE*

PURPOSE Recognize an authentic event that opens a limited market window
USE WHEN Regulatory, technological or financial trigger shifts urgency
AVOID WHEN Evidence is speculative, crisis targeting exploitative
REQUIRED EVIDENCE / CONDITIONS Source-confirmed event, affected parties and temporal cutoff
PREFERRED LINE / MOVES L01 Recon → L06 Probe; M12
WHO DECIDES / EXECUTES Research and compliance sponsor
DONE WHEN / VERIFICATION Prompt intervention produces useful decision before window closes
WORKED ILLUSTRATION New procurement rule opens demand for evidence software
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P07 Street / Trade Access Bridge | *PLAY / CANDIDATE*

PURPOSE Gain lawful local access to fragmented buyers and sellers
USE WHEN Phone lists and ads cannot reach small operators
AVOID WHEN Ambassadors pressure or misrepresent their affiliation
REQUIRED EVIDENCE / CONDITIONS Licensed venues, voluntary introductions, credible local partner
PREFERRED LINE / MOVES L04 Access Bridge; M18/M19
WHO DECIDES / EXECUTES Local Market Architect manager
DONE WHEN / VERIFICATION Verified permitted interviews, sample quality and feasible channel
WORKED ILLUSTRATION Map 25 salon owners across two neighborhoods
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P08 Two-Sided Seed | *PLAY / CANDIDATE*

PURPOSE Create useful early liquidity without unbounded subsidy
USE WHEN Sellers await users while users await supply
AVOID WHEN Quality/safety/capacity too weak
REQUIRED EVIDENCE / CONDITIONS Both-side behavioral signals, economic and fill-rate assumptions
PREFERRED LINE / MOVES L11 Balance; M38/M39
WHO DECIDES / EXECUTES Marketplace sponsor
DONE WHEN / VERIFICATION Successful matched transactions with repeat intention and cost control
WORKED ILLUSTRATION Seed reliable tire-service providers before paid demand
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P09 Positioning Comprehension | *PLAY / CANDIDATE*

PURPOSE Correct a value proposition nobody can restate
USE WHEN Awareness high but true understanding low
AVOID WHEN Misleading simplification hides material terms
REQUIRED EVIDENCE / CONDITIONS Original voice-of-customer language, comparator claims
PREFERRED LINE / MOVES L05 Message and Offer Probe; M22
WHO DECIDES / EXECUTES Brand owner
DONE WHEN / VERIFICATION Target audience explains who, what, when and why correctly
WORKED ILLUSTRATION Test “AI vendor discovery” versus actual time saved
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P10 Switching Wedge | *PLAY / CANDIDATE*

PURPOSE Find defensible advantage against a habitual incumbent
USE WHEN Satisfied category users rarely switch
AVOID WHEN No credible quantified or qualitative advantage
REQUIRED EVIDENCE / CONDITIONS Substitutes, switching cost and pilot safety
PREFERRED LINE / MOVES L03 Wedge → L07 Design Partner; M15
WHO DECIDES / EXECUTES Product sponsor
DONE WHEN / VERIFICATION Specific switchers commit for a reason that withstands objection
WORKED ILLUSTRATION Pilot complementary first, displace later
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P11 Design Partner Proof | *PLAY / CANDIDATE*

PURPOSE Build evidence for complex enterprise adoption
USE WHEN Buyer seeks proof in native processes
AVOID WHEN Partner has no staff or economic decision access
REQUIRED EVIDENCE / CONDITIONS Pilot charter, sponsor, security and measurable success
PREFERRED LINE / MOVES L07 Design Partner → L09 Build
WHO DECIDES / EXECUTES Enterprise sponsor
DONE WHEN / VERIFICATION Evaluated adoption and joint next decision
WORKED ILLUSTRATION Run one real workflow with executive and operator
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P12 Category Education to Action | *PLAY / CANDIDATE*

PURPOSE Translate unfamiliar capability into action and value
USE WHEN Users understand old alternatives but not new category
AVOID WHEN Education is branded propaganda disguised as research
REQUIRED EVIDENCE / CONDITIONS Accurate explanation, unbiased alternatives, permitted content
PREFERRED LINE / MOVES L05 Message Probe → L06 Test; M22/M10
WHO DECIDES / EXECUTES Market education steward
DONE WHEN / VERIFICATION Comprehension and subsequent voluntary meaningful action improve
WORKED ILLUSTRATION Workshop on agent-assisted local supply services
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P13 Channel Access Validation | *PLAY / CANDIDATE*

PURPOSE Test if an intermediary can deliver qualified demand
USE WHEN Reseller promises reach or platform placement
AVOID WHEN Exclusivity required before proof
REQUIRED EVIDENCE / CONDITIONS Partner referrals, economics, observed activation and disclosure
PREFERRED LINE / MOVES L08 Channel Validation; M20/M42
WHO DECIDES / EXECUTES Partner owner
DONE WHEN / VERIFICATION Net qualified activated users justify route
WORKED ILLUSTRATION Test one embedded workflow with association members
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P14 Live Demand Event | *PLAY / CANDIDATE*

PURPOSE Convert an event into measurable learning, not crowd size
USE WHEN Experiential demonstration helps explain offering
AVOID WHEN Safety, venue or permission requirements missing
REQUIRED EVIDENCE / CONDITIONS Invited segment, event consent, follow-up design and cost
PREFERRED LINE / MOVES L06 Behavioral Test; M34/M35
WHO DECIDES / EXECUTES Event lead
DONE WHEN / VERIFICATION Documented participant learning and downstream action
WORKED ILLUSTRATION Pop-up demonstration at trade center
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P15 Trial-to-Paid Conversion | *PLAY / CANDIDATE*

PURPOSE Diagnose whether trial earns a buying decision
USE WHEN Usage shows value but checkout or pricing fails
AVOID WHEN Trial did not actually deliver intended benefit
REQUIRED EVIDENCE / CONDITIONS Usage by role, objection evidence, true price / alternatives
PREFERRED LINE / MOVES L05 Reframe → L06 Price Probe; M33
WHO DECIDES / EXECUTES Growth/product owner
DONE WHEN / VERIFICATION Real paid conversions with acceptable churn and margin
WORKED ILLUSTRATION Test paid pilot fee versus perpetual free tier
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P16 Community Trust Loop | *PLAY / CANDIDATE*

PURPOSE Earn authentic belonging and referral without manipulation
USE WHEN Local or professional relationships matter to purchase
AVOID WHEN Paid influence undisclosed, vulnerable people targeted
REQUIRED EVIDENCE / CONDITIONS Community needs, transparent benefit, independent critique
PREFERRED LINE / MOVES L14 Community/Partner; M27/M52
WHO DECIDES / EXECUTES Community steward
DONE WHEN / VERIFICATION Repeated authentic interactions and verified useful referrals
WORKED ILLUSTRATION Professional circle hosts peer learning without forced promotion
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P17 Consensus and Buying Roles | *PLAY / CANDIDATE*

PURPOSE Map enterprise objections across economic, technical and user stakeholders
USE WHEN Champion cannot progress deal without committee
AVOID WHEN Missing procurement process or misleading authority
REQUIRED EVIDENCE / CONDITIONS Decision-rights map and agreed evaluation objectives
PREFERRED LINE / MOVES L07 Partner Proof; M24/M25
WHO DECIDES / EXECUTES Enterprise field lead
DONE WHEN / VERIFICATION Actual buyer committee endorses a next step
WORKED ILLUSTRATION Secure security, finance and end-user sign-off for limited pilot
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P18 Offer Fit Reframe | *PLAY / CANDIDATE*

PURPOSE Change a mismatched offer based on patterned evidence
USE WHEN Same valid objection recurs across qualified prospects
AVOID WHEN Feedback is from non-target or sales artifact alone
REQUIRED EVIDENCE / CONDITIONS Segment cohorts, objection taxonomy, feasibility and margin
PREFERRED LINE / MOVES L05 Message/Offer; M29/M33
WHO DECIDES / EXECUTES Product and marketing leads
DONE WHEN / VERIFICATION Modified offer has better paid behavior than prior version
WORKED ILLUSTRATION Reduce onboarding complexity rather than discount
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P19 Supply / Delivery Balancing | *PLAY / CANDIDATE*

PURPOSE Prevent demand generation from breaking service
USE WHEN Wait times, cancellations or quality flags rise
AVOID WHEN Supply-side safety or legal obligations unresolved
REQUIRED EVIDENCE / CONDITIONS Capacity, coverage, service quality, cancellations, cost
PREFERRED LINE / MOVES L11 Balance → L09 Build; M40
WHO DECIDES / EXECUTES Service owner
DONE WHEN / VERIFICATION Reliability and fill rate return to supported target
WORKED ILLUSTRATION Throttle ad spend until technicians can meet booking windows
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P20 Trust-and-Quality Assurance | *PLAY / CANDIDATE*

PURPOSE Reduce credible perceived risk with real protections
USE WHEN User mistrust prevents justified adoption
AVOID WHEN Promised guarantee cannot be funded or honored
REQUIRED EVIDENCE / CONDITIONS Credentials, dispute handling, privacy and quality evidence
PREFERRED LINE / MOVES L09 Build; M41/M45
WHO DECIDES / EXECUTES Ops + compliance
DONE WHEN / VERIFICATION Quality and complaint rates independently improve
WORKED ILLUSTRATION Transparent provider verification and remediation flow
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P21 Partner Economics and Governance | *PLAY / CANDIDATE*

PURPOSE Make partner exchange viable and appropriately bounded
USE WHEN Distribution partner demands uncertain commitments
AVOID WHEN Missing decision rights or anti-competitive issue
REQUIRED EVIDENCE / CONDITIONS Commercial forecast, alternatives, exit and counsel
PREFERRED LINE / MOVES L08 Channel; M42/M44
WHO DECIDES / EXECUTES Partner signatory
DONE WHEN / VERIFICATION Agreed terms and tracked cohort returns without dependency trap
WORKED ILLUSTRATION Start nonexclusive before granting territory protection
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P22 Supply Activation | *PLAY / CANDIDATE*

PURPOSE Turn nominal supply into actually available inventory or service
USE WHEN Many listed suppliers but few accept jobs
AVOID WHEN Providers lack competence or capacity
REQUIRED EVIDENCE / CONDITIONS Onboarding, training, availability and fair terms
PREFERRED LINE / MOVES L11 Balance; M38/M41
WHO DECIDES / EXECUTES Operations owner
DONE WHEN / VERIFICATION Confirmed accepted and completed work capacity
WORKED ILLUSTRATION Credential and book local providers for defined shifts
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P23 Margin Integrity | *PLAY / CANDIDATE*

PURPOSE Detect loss-making discounts, churn and attribution distortion
USE WHEN Topline revenue grows, gross contribution deteriorates
AVOID WHEN No reliable cost or data rights
REQUIRED EVIDENCE / CONDITIONS Revenue, fees, incentives, human labor, refunds and payback
PREFERRED LINE / MOVES L12 Margin Gate; M43/M44
WHO DECIDES / EXECUTES Finance and growth sponsor
DONE WHEN / VERIFICATION Corrected net economics guide continue/pause
WORKED ILLUSTRATION Creator commissions make booked orders unprofitable
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P24 Activation Reliability | *PLAY / CANDIDATE*

PURPOSE Make initial user value consistently attainable
USE WHEN Conversion high but drop-offs cluster in onboarding
AVOID WHEN Core value not yet demonstrated
REQUIRED EVIDENCE / CONDITIONS Funnel events, failure recordings with consent, error categories
PREFERRED LINE / MOVES L09 First Transaction; M30/M31
WHO DECIDES / EXECUTES Product/ops owner
DONE WHEN / VERIFICATION First value time and completion improve in held-out cohort
WORKED ILLUSTRATION Eliminate repeated ID verification steps where lawful
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P25 Channel Saturation and Renewal | *PLAY / CANDIDATE*

PURPOSE Detect marginal decline and diversify thoughtfully
USE WHEN CPC rises or same people see repeated outreach
AVOID WHEN New channel is untested or violates contact rights
REQUIRED EVIDENCE / CONDITIONS Marginal cohort returns, creative fatigue, audience overlap
PREFERRED LINE / MOVES L10 Repeatable Acquisition; M47/M48
WHO DECIDES / EXECUTES Growth sponsor
DONE WHEN / VERIFICATION Incremental cohort quality and marginal margin stabilize
WORKED ILLUSTRATION Switch to referral test after search saturation
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P26 Permission and Compliance Review | *PLAY / CANDIDATE*

PURPOSE Establish whether outreach and field conduct are permissible
USE WHEN Unknown local sector restrictions or platform terms
AVOID WHEN Expert required and no permitted workaround
REQUIRED EVIDENCE / CONDITIONS Legal/ad platform policies; consent, retention and data map
PREFERRED LINE / MOVES L16 Protect/Pause; M55
WHO DECIDES / EXECUTES Legal/compliance specialist
DONE WHEN / VERIFICATION Approved route or explicit prohibition and safe stop
WORKED ILLUSTRATION Do not send unconsented health-related targeting messages
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P27 Geography Transfer | *PLAY / CANDIDATE*

PURPOSE Validate repeatability across cultural and logistical boundaries
USE WHEN Success in first city prompts wider launch
AVOID WHEN One-city sample or supply economics too atypical
REQUIRED EVIDENCE / CONDITIONS Matched market comparison, local authority and holdout
PREFERRED LINE / MOVES L15 Transfer; M50/M51
WHO DECIDES / EXECUTES Regional expansion owner
DONE WHEN / VERIFICATION New territory produces independently verified positive economics
WORKED ILLUSTRATION Pilot in one adjacent city before national scaling
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P28 Adjacency Validation | *PLAY / CANDIDATE*

PURPOSE Find genuine next job near proven users or partners
USE WHEN Established users request related workflows
AVOID WHEN Cross-sell request is one-off or weakly priced
REQUIRED EVIDENCE / CONDITIONS Jobs, market boundary, switching and supply cost
PREFERRED LINE / MOVES L03 Wedge → L06 Test; M13/M14
WHO DECIDES / EXECUTES Portfolio/product sponsor
DONE WHEN / VERIFICATION New use case earns independent paid usage
WORKED ILLUSTRATION Expand invoice awareness into real payment reconciliation service
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P29 Creator / Community Fit | *PLAY / CANDIDATE*

PURPOSE Audit whether reach translates to relevant trusted action
USE WHEN Influencer claims to reach ideal customers
AVOID WHEN Disclosure or identity/cultural mismatches unresolved
REQUIRED EVIDENCE / CONDITIONS Actual consented audience signal, rates, cohorts
PREFERRED LINE / MOVES L14 Community; M26/M27
WHO DECIDES / EXECUTES Community/creator lead
DONE WHEN / VERIFICATION Audience activates in attributable and credible cohort
WORKED ILLUSTRATION Local home chef producer gains real recurring subscribers
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P30 First Market System Build | *PLAY / CANDIDATE*

PURPOSE Assemble minimal viable offer, route, supply, trust, economics
USE WHEN First commitments exist but transactions break
AVOID WHEN No safe lawful delivery channel
REQUIRED EVIDENCE / CONDITIONS Service blueprint, handoffs, contingency, customer and provider terms
PREFERRED LINE / MOVES L09 First Transaction; M36/M37
WHO DECIDES / EXECUTES Market builder
DONE WHEN / VERIFICATION End-to-end delivery verified for repeat sample
WORKED ILLUSTRATION Coordinate intake, dispatch, payment, issue handling for repair service
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P31 Scale System Repair | *PLAY / CANDIDATE*

PURPOSE Repair a scaling engine rather than buy more traffic
USE WHEN Channels look productive but service quality or margin falls
AVOID WHEN No root-cause evidence for proposed change
REQUIRED EVIDENCE / CONDITIONS Cross-cohort metrics, provider economics and process trace
PREFERRED LINE / MOVES L12 Margin → L15 Transfer; M43/M49
WHO DECIDES / EXECUTES Market Faculty and sponsor
DONE WHEN / VERIFICATION Contributions and trust recover for sustained period
WORKED ILLUSTRATION Fix dispatch bottleneck before doubling promotion
PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

H-P32 Pause, Reframe or Retire | *PLAY / CANDIDATE*

PURPOSE Prevent effort and incentive bias from keeping a bad thesis alive

USE WHEN Repeated disconfirmation, ethics issue or negative margin

AVOID WHEN A safer investigation can still resolve high-value uncertainty cheaply

REQUIRED EVIDENCE / CONDITIONS Investment-to-learn ratio, obligations, transition and lessons

PREFERRED LINE / MOVES L16 Reframe/Stop; M54/M55

WHO DECIDES / EXECUTES Sponsor + governance owner

DONE WHEN / VERIFICATION Spend ceases or reallocated, participants protected, lessons retained

WORKED ILLUSTRATION Discontinue unviable local food delivery wedge safely

PIONEER'S NOTE A Play does not prescribe a universal channel or timeline; select a conditional Line for the actual Position.

13 Line catalogue — conditional market protocols

A Line is a rehearsed, stateful and time-aware plan—not a funnel automation. Each has opening, branch, safe stop, fallback and verification. These proposed example plan windows are research defaults and must be calibrated to the market and consent regime.

H-L01 Territory Reconnaissance | *LINE / CANDIDATE*

PURPOSE Define market boundary and make reality visible

USE WHEN Unmapped territory or archetype

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Bound market → 2 gather independent desk/field sources → 3 map buying/supply actors → 4 record counterevidence → 5 Review Position | BRANCH: If inaccessible, test intermediary; if structural legal gate, park

WHO DECIDES / EXECUTES Research owner + field steward

DONE WHEN / VERIFICATION Market system map with source limitations and alternative wedges

WORKED ILLUSTRATION 2–4 weeks illustrative

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L02 Disconfirming Discovery | *LINE / CANDIDATE*

PURPOSE Try to refute the current market thesis cheaply

USE WHEN Strong assumption without behavioral proof

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Name falsifier → 2 select negative cases → 3 run impartial probes → 4 attempt meaningful action → 5 compare competing explanations | BRANCH: If negative decisive, stop; if undecidable, redesign test

WHO DECIDES / EXECUTES Research Lead; independent critic

DONE WHEN / VERIFICATION Valid contradictory evidence changes Position or bounded confidence

WORKED ILLUSTRATION 1–3 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L03 Wedge Selection | *LINE / CANDIDATE*

PURPOSE Choose one segment instead of diffuse TAM

USE WHEN Many plausible buyers, resource constraints

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Segment by job/trigger/access → 2 model economics → 3 compare opposing segments → 4 select first wedge → 5 lock test boundary | BRANCH: If segment too small, test adjacency; if inaccessible, bridge channel

WHO DECIDES / EXECUTES Sponsor and Faculty Manager

DONE WHEN / VERIFICATION Narrow market thesis approved with credible alternatives

WORKED ILLUSTRATION 1–2 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L04 Access Bridge | *LINE / CANDIDATE*

PURPOSE Earn permission and trust for first market interactions

USE WHEN Buyers hidden or local access fragmented

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Map nodes → 2 establish ethical introduction terms → 3 recruit local partner → 4 run small field mission → 5 audit qualified access | BRANCH: If trust refuses, change path; if opt-out, halt contact

WHO DECIDES / EXECUTES Market Architect manager

DONE WHEN / VERIFICATION Consented qualified engagement and comparable source trace

WORKED ILLUSTRATION 2–4 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L05 Message and Offer Probe | *LINE / CANDIDATE*

PURPOSE Translate problem into useful, comprehensible proposition

USE WHEN Offer language unproven or objections recurring

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Capture buyer vocabulary → 2 draft two truthful variants → 3 comprehension check → 4 limited use-case demonstration → 5 score action | BRANCH: If message misunderstood, revise; if no real need, return L02

WHO DECIDES / EXECUTES Brand owner + Research

DONE WHEN / VERIFICATION Understanding and actual behavior improve without false claims

WORKED ILLUSTRATION 1–3 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L06 Behavioral Test | *LINE / CANDIDATE*

PURPOSE Seek least-cost meaningful commitment

USE WHEN Interview enthusiasm not backed by action

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Define valid behavior → 2 ensure capacity and permission → 3 invite action → 4 observe conversion and objections → 5 compare baseline | BRANCH: If incentive distorts, adjust; if no action, disconfirm

WHO DECIDES / EXECUTES Growth sponsor

DONE WHEN / VERIFICATION Real commitments with stated quality and confidence

WORKED ILLUSTRATION 1–4 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L07 Design Partner Loop | *LINE / CANDIDATE*

PURPOSE Turn early co-design into real adoption evidence

USE WHEN Complex buyer needs situated proof

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Agree reciprocal charter → 2 map workflows → 3 construct narrow pilot → 4 observe usage → 5 compare outcomes → 6 decide next | BRANCH: If security/authority blocks, no live data; use synthetic world

WHO DECIDES / EXECUTES Product/enterprise sponsor

DONE WHEN / VERIFICATION Pilot value verified and next decision explicitly recorded

WORKED ILLUSTRATION 4–10 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L08 Channel Validation | *LINE / CANDIDATE*

PURPOSE Test productive intermediary distribution

USE WHEN Partner promises reach but conversion unknown

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Verify partner ability → 2 map mutual offer → 3 cap test → 4 run referred cohort → 5 reconcile conversion and costs | BRANCH: If partner requires untested exclusivity, decline; if weak audience, change partner

WHO DECIDES / EXECUTES Partnership owner

DONE WHEN / VERIFICATION Incremental attributable activation and viable partner economics

WORKED ILLUSTRATION 3–8 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L09 First Transaction Build | *LINE / CANDIDATE*

PURPOSE Connect demand, delivery, support, payment and quality

USE WHEN Customer commitment but incomplete market mechanism

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Blueprint end-to-end journey → 2 source/verify capacity → 3 complete manual concierge transaction → 4 fix failures → 5 verify economics | BRANCH: If safety fails, stop service; if economics negative, redesign before scaling

WHO DECIDES / EXECUTES Operations owner

DONE WHEN / VERIFICATION Completed genuine value with correct handling and proof

WORKED ILLUSTRATION 3–8 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L10 Repeatable Acquisition | *LINE / CANDIDATE*

PURPOSE Convert isolated wins into reproducible acquisition

USE WHEN First transactions succeeded

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Freeze cohort definition → 2 instrument sources → 3 repeat with independent sample → 4 compare CAC/quality/retention → 5 expand cautiously | BRANCH: If marginal CAC spikes, throttle; if retained value fails, return L09

WHO DECIDES / EXECUTES Growth and finance

DONE WHEN / VERIFICATION Healthy incremental cohort economics and reproducible execution

WORKED ILLUSTRATION 4–12 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L11 Supply–Demand Balance | *LINE / CANDIDATE*

PURPOSE Manage cold start, liquidity and provider readiness

USE WHEN Marketplace lacks matching or service depth

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Map demand clusters → 2 verify providers → 3 stage inventory → 4 match constrained demand → 5 study cancellations/quality → 6 adjust incentives | BRANCH: If fill-rate degrades, pause buyer growth; if unbounded subsidy, reprice

WHO DECIDES / EXECUTES Marketplace manager

DONE WHEN / VERIFICATION Durable match quality and acceptable subsidy/cost envelope

WORKED ILLUSTRATION 4–10 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L12 Margin and Payback Gate | *LINE / CANDIDATE*

PURPOSE Control real incremental returns through acquisition and fulfillment

USE WHEN Discounts, referrals or regional scale underway

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Build cost-to-serve → 2 separate incremental from attributed sales → 3 stress test refund/churn → 4 challenge assumptions → 5 decide scale/pause | BRANCH: If evidence absent, remain pilot; if margin negative, stop spend

WHO DECIDES / EXECUTES Finance sponsor

DONE WHEN / VERIFICATION Contribution and payback independently reproducible

WORKED ILLUSTRATION 2–5 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L13 Localized Entry | *LINE / CANDIDATE*

PURPOSE Adapt offering, evidence and operating channels to territory

USE WHEN Expansion crosses a cultural or regulatory boundary

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 local mapping → 2 counsel/permissions → 3 recruit field interpreters → 4 adapt message/delivery → 5 controlled pilot → 6 review | BRANCH: If compliance or safety blocked, no launch; if buyer role differs, remap

WHO DECIDES / EXECUTES Regional Principal

DONE WHEN / VERIFICATION Field-observed local adoption and quality evidence

WORKED ILLUSTRATION 4–12 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L14 Community and Partner Loop | *LINE / CANDIDATE*

PURPOSE Make repeated mutually useful participation durable

USE WHEN Trusted nodes and advocates can influence adoption

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Listen to community → 2 define reciprocal value → 3 recruit authentic partners → 4 convene/serve → 5 enable optional action → 6 track retention | BRANCH: If advocacy becomes deceptive or coercive, stop; if no benefit, reframe

WHO DECIDES / EXECUTES Community steward

DONE WHEN / VERIFICATION Earned repeat participation, trust and attributable referrals

WORKED ILLUSTRATION 6–12 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L15 Transfer and Scale | *LINE / CANDIDATE*

PURPOSE Validate a proven market mechanism in an adjacent market

USE WHEN Current wedge passes repeatability gate

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Compare new-market differences → 2 simulate failure → 3 recruit local capability → 4 run held-out entry → 5 measure incremental economics → 6 staged scale | BRANCH: If new-market failure or core deterioration, stop replication and diagnose

WHO DECIDES / EXECUTES Sponsor / expansion lead

DONE WHEN / VERIFICATION Independent G4/G5 gate passed with stable quality

WORKED ILLUSTRATION 6–16 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L16 Reframe or Stop | *LINE / CANDIDATE*

PURPOSE Preserve learning, relationships, data rights and capital on exit

USE WHEN Hypothesis failed or risk unacceptable

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Log reason → 2 protect participants and obligations → 3 stop harmful activity → 4 extract valid learning → 5 test pivot against alternatives → 6 close or restart | BRANCH: If immediate harm, skip experiments and stop; if obligations exist, execute transition

WHO DECIDES / EXECUTES Sponsor + governance

DONE WHEN / VERIFICATION Verified halt/handoff; evidence-backed new thesis if any

WORKED ILLUSTRATION Immediate safety stop; otherwise next review cycle

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L17 Human Field Mission | *LINE / CANDIDATE*

PURPOSE Execute a targeted physical-world investigation or action safely

USE WHEN Digital systems cannot observe local reality sufficiently

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Mission charter → 2 recruit/qualify local humans → 3 train protocol and rights → 4 dispatch → 5 capture claims/evidence → 6 independent QA | BRANCH: If unsafe, withdraw; if fabricated claims, quarantine and investigate

WHO DECIDES / EXECUTES Hipstraw field operations

DONE WHEN / VERIFICATION Accepted source-backed mission outputs, paid worker and no unresolved safety incident

WORKED ILLUSTRATION Hours to weeks by assignment

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L18 Campaign as Experiment | *LINE / CANDIDATE*

PURPOSE Run a campaign with a falsifiable claim and sound attribution

USE WHEN Distribution test has a credible hypothesis

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Define intervention/control → 2 approve creatives/recipients/spend → 3 execute → 4 observe intermediate/long outcomes → 5 stop or iterate | BRANCH: If misleading claim, opt-out failure or cost cap hit, pause immediately

WHO DECIDES / EXECUTES Campaign sponsor

DONE WHEN / VERIFICATION Incremental outcome, total cost, uncertainty and adverse effects reported

WORKED ILLUSTRATION 1–8 weeks

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L19 Pioneer Portfolio Review | *LINE / CANDIDATE*

PURPOSE Allocate scarce effort across multiple competing Market Positions

USE WHEN Many potential opportunities are active simultaneously

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Refresh all Positions → 2 record signals and cost of learning → 3 compare alternatives → 4 set stage budgets → 5 request portfolio dispositions | BRANCH: If missing key evidence, fund narrow test not full program

WHO DECIDES / EXECUTES Hipstraw Faculty Executive and sponsor

DONE WHEN / VERIFICATION Rationalized investment slate with no hidden unfunded commitments

WORKED ILLUSTRATION Weekly / monthly

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

H-L20 Post-Launch Reliability Pursuit | *LINE / CANDIDATE*

PURPOSE Own ongoing market mechanism after acquisition

USE WHEN Purchases or partner commitments create follow-through obligations

AVOID WHEN Do not run when material authority or safety preconditions fail.

REQUIRED EVIDENCE / CONDITIONS Versioned Position, permission, required instrument, decision cutoff and outcome source.

PREFERRED LINE / MOVES 1 Accept bounded case → 2 watch quality/retention → 3 investigate deviations → 4 coordinate human and host fixes → 5 independently verify → 6 close/reopen | BRANCH: If authority changes, stop affected effects; if outcomes unverifiable, keep open

WHO DECIDES / EXECUTES Market Operations Faculty manager

DONE WHEN / VERIFICATION Customer value, delivery and financial effects confirmed through independent sources

WORKED ILLUSTRATION Continuous for mandate term

PIONEER'S NOTE These are illustrative plan windows, not SLAs or universal compliance periods.

14 Move catalogue — purposeful interventions

Move IDs reference commercial or market interventions, not low-level API operations. For effectful Moves, the actual skill must be constructed and attached to an approved human, tool, service or agent execution binding. A proposed Move lacking such a binding remains SPECIFIED_ONLY.

H-M01 Contextual Observation | *MOVE / SPECIFIED ONLY*

PURPOSE Observe how people currently solve the job
USE WHEN Hidden behavior, workaround or physical setting
AVOID WHEN No lawful/consented observation channel
REQUIRED EVIDENCE / CONDITIONS Site protocol, sampling log
PREFERRED LINE / MOVES A01, A02, A05; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Validated observations anchored to context
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M02 Interview Contradiction Probe | *MOVE / SPECIFIED ONLY*

PURPOSE Ask questions likely to expose weak thesis
USE WHEN Enthusiasm unsupported by specific past behavior
AVOID WHEN Leading or coercive probes
REQUIRED EVIDENCE / CONDITIONS Open protocol and alternative interpretations
PREFERRED LINE / MOVES A03, A04; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Supported vs contested behavior clearly separated
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M03 Disconfirming Probe | *MOVE / SPECIFIED ONLY*

PURPOSE Recruit negative or non-adopter cases
USE WHEN Research only among friendly early adopters
AVOID WHEN Cherry-picked failure cases
REQUIRED EVIDENCE / CONDITIONS Sampling rationale, neutral prompts
PREFERRED LINE / MOVES A03, A05; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Claim narrowed by adverse evidence
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M04 Workaround Documentation | *MOVE / SPECIFIED ONLY*

PURPOSE Record substitute tasks, pain and cost
USE WHEN Unmet job appears through manual work
AVOID WHEN Would expose protected operational secrets
REQUIRED EVIDENCE / CONDITIONS Voluntary context and approved notes
PREFERRED LINE / MOVES A02, A06; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Substitute map grounded in evidence
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M05 Source Triangulation | *MOVE / SPECIFIED ONLY*

PURPOSE Check claim against independent sources
USE WHEN Desk or anecdotal market signal is material
AVOID WHEN No independent source exists; disclose limit
REQUIRED EVIDENCE / CONDITIONS Source timestamps and provenance
PREFERRED LINE / MOVES A04, A07; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Dissonance and uncertainty documented
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M06 Audience Source Mapping | *MOVE / SPECIFIED ONLY*

PURPOSE Build reachable archetype and role map
USE WHEN Audience or buying access unclear
AVOID WHEN Protected personal data harvested without lawful basis
REQUIRED EVIDENCE / CONDITIONS Archetype, consent/permission basis
PREFERRED LINE / MOVES A01, A08; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Qualified addressable route mapped
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M07 Local Institution Mapping | *MOVE / SPECIFIED ONLY*

PURPOSE Identify associations, trade rules, trust nodes
USE WHEN New territory or regulated sector
AVOID WHEN Stereotyping based on a few intermediaries
REQUIRED EVIDENCE / CONDITIONS Local research and counsel where required
PREFERRED LINE / MOVES A01, A09; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Verified local ecosystem account
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M08 Local Interpreter Mission | *MOVE / SPECIFIED ONLY*

PURPOSE Request situated local-language/culture diligence
USE WHEN Remote model inference may misread region
AVOID WHEN Unqualified or unsafe field task
REQUIRED EVIDENCE / CONDITIONS Training, pay, consent and QA criteria
PREFERRED LINE / MOVES A28, A29; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Local claims independently checked
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M09 Archetype Segmentation | *MOVE / SPECIFIED ONLY*

PURPOSE Separate buyers by trigger, use, context and economics
USE WHEN Diffuse “everyone” strategy
AVOID WHEN Segmentation by sensitive attribute without purpose or compliance
REQUIRED EVIDENCE / CONDITIONS Behavioral cohorts and source limits
PREFERRED LINE / MOVES A08, A10; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Testable audience boundaries
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M10 Behavioral Commitment Test | *MOVE / SPECIFIED ONLY*

PURPOSE Ask for meaningful real next action
USE WHEN Positive reactions do not prove intent
AVOID WHEN No delivery capacity or misleading terms
REQUIRED EVIDENCE / CONDITIONS Clear action, valid recipient, outcome tracking
PREFERRED LINE / MOVES A11, A12; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Observed response with denominator and nonresponse
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M11 Interview Recruitment | *MOVE / SPECIFIED ONLY*

PURPOSE Acquire balanced consenting respondents
USE WHEN Need to test specific segment
AVOID WHEN Uncontrolled spam or only insider samples
REQUIRED EVIDENCE / CONDITIONS Sampling and opt-out protocol
PREFERRED LINE / MOVES A08, A13; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Achieved auditable eligible sample
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M12 Trigger Verification | *MOVE / SPECIFIED ONLY*

PURPOSE Establish existence and timing of buying event
USE WHEN Market urgency tied to an event
AVOID WHEN Event rumor or speculative urgency
REQUIRED EVIDENCE / CONDITIONS Authoritative document or credible observation
PREFERRED LINE / MOVES A07, A14; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Date, applicability and affected population verified
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M13 Adjacent Job Probe | *MOVE / SPECIFIED ONLY*

PURPOSE Test whether same users genuinely buy neighboring use case
USE WHEN Cross-sell or product adjacency hypothesis
AVOID WHEN Existing relationship assumed to grant demand
REQUIRED EVIDENCE / CONDITIONS Job/use profile; separate economics
PREFERRED LINE / MOVES A03, A11; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Independent commitment for adjacent job
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M14 Portfolio Opportunity Ranking | *MOVE / SPECIFIED ONLY*

PURPOSE Compare market wedges under uncertainty
USE WHEN Several funded options compete
AVOID WHEN Weights hide hard safety/authority gate
REQUIRED EVIDENCE / CONDITIONS Transparent rubric and alternative scenarios
PREFERRED LINE / MOVES A15, A16; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Decision report with uncertainty and recommendation
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M15 Alternative Mapping | *MOVE / SPECIFIED ONLY*

PURPOSE Discover real incumbent and DIY substitutes
USE WHEN Displacement / new category
AVOID WHEN Competitor comparison invented or unfair
REQUIRED EVIDENCE / CONDITIONS First-hand substitute behavior, public terms
PREFERRED LINE / MOVES A01, A10; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Credible switching map
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M16 Switching Friction Test | *MOVE / SPECIFIED ONLY*

PURPOSE Measure true behavioral cost of change
USE WHEN Customer likes idea but stays incumbent
AVOID WHEN New solution cannot support migration safely
REQUIRED EVIDENCE / CONDITIONS Trial design, cost and fallback
PREFERRED LINE / MOVES A11, A17; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Actual switch or quantified honest refusal
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M17 Buyer Job / Budget Map | *MOVE / SPECIFIED ONLY*

PURPOSE Identify user, champion, payer and outcome owner
USE WHEN B2B adoption involves several principals
AVOID WHEN Claims without authority
REQUIRED EVIDENCE / CONDITIONS Role/decision evidence
PREFERRED LINE / MOVES A08, A09; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION True buying process and constraints recorded
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M18 Trusted Introduction | *MOVE / SPECIFIED ONLY*

PURPOSE Earn warm introduction with reciprocal value
USE WHEN Segment difficult to access directly
AVOID WHEN Agent falsely claims affiliation
REQUIRED EVIDENCE / CONDITIONS Partner consent, clear purpose
PREFERRED LINE / MOVES A18, A19; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Accepted qualified intro with consent
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M19 Trade/Street Mapping | *MOVE / SPECIFIED ONLY*

PURPOSE Survey local provider/buyer surface ethically
USE WHEN Market is physically fragmented
AVOID WHEN Photography or intercept unauthorized
REQUIRED EVIDENCE / CONDITIONS Field route, venue rights, participant terms
PREFERRED LINE / MOVES A28, A06; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Verified coverage and deviations reported
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M20 Channel Qualification Audit | *MOVE / SPECIFIED ONLY*

PURPOSE Test partner's actual qualified access
USE WHEN Partner claims large audience
AVOID WHEN Exclusive contract demanded before pilot
REQUIRED EVIDENCE / CONDITIONS Historical reach, sample provenance, economics
PREFERRED LINE / MOVES A20, A21; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Qualified introduced cohort and quality observed
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M21 Partner Value Exchange Design | *MOVE / SPECIFIED ONLY*

PURPOSE Specify give/get and channel economics
USE WHEN Distribution requires institutional support
AVOID WHEN Unbounded inducement or conflict
REQUIRED EVIDENCE / CONDITIONS Mutual objectives, ROI, termination
PREFERRED LINE / MOVES A21, A22; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Balanced, approved partner proposal
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M22 Proposition Comprehension Test | *MOVE / SPECIFIED ONLY*

PURPOSE Test accurate understanding before conversion
USE WHEN New category or complex value claim
AVOID WHEN Misleading simplification
REQUIRED EVIDENCE / CONDITIONS Truthful variants, respondent explanation
PREFERRED LINE / MOVES A23, A24; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Respondents correctly describe offered value
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M23 Message Variant Experiment | *MOVE / SPECIFIED ONLY*

PURPOSE Compare specific claims without changing many variables
USE WHEN Offer positioning under test
AVOID WHEN One variant uses fabricated proof
REQUIRED EVIDENCE / CONDITIONS Approved creative, design, sample
PREFERRED LINE / MOVES A23, A25; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Difference in qualified action estimated
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M24 Buying Committee Map | *MOVE / SPECIFIED ONLY*

PURPOSE Identify economic, technical and practical approvals
USE WHEN Champion cannot progress alone
AVOID WHEN Bypass due procurement and privacy controls
REQUIRED EVIDENCE / CONDITIONS Named roles, stage evidence
PREFERRED LINE / MOVES A08, A26; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Real sponsor/committee map and decision route
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M25 Objection Evidence Capture | *MOVE / SPECIFIED ONLY*

PURPOSE Distinguish offer problems from generic objections
USE WHEN Repeated stalls or drop-offs
AVOID WHEN Sales-agent summaries not verified
REQUIRED EVIDENCE / CONDITIONS Raw allowed notes, taxonomy
PREFERRED LINE / MOVES A04, A27; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Causes prioritized by validity
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M26 Creator Audience Fit Test | *MOVE / SPECIFIED ONLY*

PURPOSE Validate creators' relevant active audiences
USE WHEN Influencer or community partnership offered
AVOID WHEN Unverifiable audience, deceptive paid endorsement
REQUIRED EVIDENCE / CONDITIONS Platform metrics, sample, disclosure
PREFERRED LINE / MOVES A20, A23; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Qualified actions not just impressions
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M27 Authentic Partner Mission | *MOVE / SPECIFIED ONLY*

PURPOSE Recruit and support credible advocates fairly
USE WHEN Community learning or local trust necessary
AVOID WHEN Paid advocate represented as independent
REQUIRED EVIDENCE / CONDITIONS Contract, disclosure, safety
PREFERRED LINE / MOVES A18, A29; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Continued trust and voluntarily engaged users
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M28 Outcome Prototype | *MOVE / SPECIFIED ONLY*

PURPOSE Make buyer try valuable narrow outcome
USE WHEN Enterprise deal needs workflow-level evidence
AVOID WHEN No authorization to touch real customer data
REQUIRED EVIDENCE / CONDITIONS Pilot contract, safe test environment
PREFERRED LINE / MOVES A11, A30; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Customer observes measurable value
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M29 Objection Taxonomy | *MOVE / SPECIFIED ONLY*

PURPOSE Map reasons for rejection and counterfactuals
USE WHEN Similar declines across interviews or sales
AVOID WHEN All objections blamed on price
REQUIRED EVIDENCE / CONDITIONS Coded evidence and independent review
PREFERRED LINE / MOVES A04, A27; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Ranked actionable gaps by segment
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M30 Friction Observation | *MOVE / SPECIFIED ONLY*

PURPOSE Find hidden points where people cannot activate
USE WHEN Many registrations but no first value
AVOID WHEN Unauthorized monitoring of user sessions
REQUIRED EVIDENCE / CONDITIONS Permissioned event instrumentation
PREFERRED LINE / MOVES A31, A32; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Root-cause friction identified
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M31 First-Value Path Repair | *MOVE / SPECIFIED ONLY*

PURPOSE Remove the smallest verified onboarding obstacle
USE WHEN Specific activation failure is supported
AVOID WHEN Change hides critical safety or compliance step
REQUIRED EVIDENCE / CONDITIONS Product owner and quality test
PREFERRED LINE / MOVES A33, A30; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Improved first-value completion with no new harm
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M32 Trial Meaningfulness Audit | *MOVE / SPECIFIED ONLY*

PURPOSE Check trial represents real task value
USE WHEN Trial starts but buyer does not invest effort
AVOID WHEN No proof trial can succeed
REQUIRED EVIDENCE / CONDITIONS User goals and observed actions
PREFERRED LINE / MOVES A31, A04; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Valid trial learning, not hollow sign-ups
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M33 Price / Value Exchange Probe | *MOVE / SPECIFIED ONLY*

PURPOSE Test fair price and risk allocation
USE WHEN Paid conversion weaker than perceived need
AVOID WHEN Misleading pre-commitment or hidden fees
REQUIRED EVIDENCE / CONDITIONS Approved pricing terms and analysis
PREFERRED LINE / MOVES A11, A34; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Observed willingness to pay and retained value
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M34 Live Demo Event | *MOVE / SPECIFIED ONLY*

PURPOSE Stage permitted demonstration with a learning goal
USE WHEN In-person context shows value better
AVOID WHEN Event is vanity crowd or unsafe
REQUIRED EVIDENCE / CONDITIONS Venue, privacy, offer and staff plan
PREFERRED LINE / MOVES A35, A36; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Participants understand and can voluntarily act
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M35 Post-Event Qualification | *MOVE / SPECIFIED ONLY*

PURPOSE Connect event participants to actual outcome
USE WHEN Sign-ups collected at event
AVOID WHEN No permission to follow up
REQUIRED EVIDENCE / CONDITIONS Consent and identifier mapping
PREFERRED LINE / MOVES A37, A11; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Verified qualified responses and opt-outs respected
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M36 Manual Fulfillment Proof | *MOVE / SPECIFIED ONLY*

PURPOSE Run narrow concierge delivery before automation
USE WHEN Product/system immature but demand test valuable
AVOID WHEN Humans unsafe, unqualified or economics hidden
REQUIRED EVIDENCE / CONDITIONS Service plan, customer expectations, receipt
PREFERRED LINE / MOVES A38, A39; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Completed delivery, cost and defects accounted
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M37 Design Partner Terms | *MOVE / SPECIFIED ONLY*

PURPOSE Secure authentic reciprocal pilot conditions
USE WHEN Early customer helps shape offer
AVOID WHEN Unreasonable unpaid research extraction
REQUIRED EVIDENCE / CONDITIONS Narrow scope, IP, confidentiality, incentives
PREFERRED LINE / MOVES A21, A40; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Partner rights and commitments clear
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M38 Provider Readiness Audit | *MOVE / SPECIFIED ONLY*

PURPOSE Establish whether “listed supply” can really deliver
USE WHEN Marketplace has nominal supply
AVOID WHEN Missing licenses/credentials or unsafe operations
REQUIRED EVIDENCE / CONDITIONS Provider permissions, slots, SLA and verification
PREFERRED LINE / MOVES A28, A41; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Real available service capacity certified locally
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M39 Liquidity Seeding | *MOVE / SPECIFIED ONLY*

PURPOSE Balance side participation in micro-market
USE WHEN Two-sided cold start
AVOID WHEN Subsidies hide unsustainable demand
REQUIRED EVIDENCE / CONDITIONS Demand cluster and supply proof
PREFERRED LINE / MOVES A38, A42; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Matched fulfilled transactions in accepted bounds
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M40 Capacity/Service Reliability Gate | *MOVE / SPECIFIED ONLY*

PURPOSE Throttle demand until fulfillment can keep promise
USE WHEN Service failures rise with acquisition
AVOID WHEN Unsafe provider or material complaint remains unresolved
REQUIRED EVIDENCE / CONDITIONS Capacity, backlog, complaint and refund data
PREFERRED LINE / MOVES A43, A44; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Approved safe capacity limit observed
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M41 Assured Pilot | *MOVE / SPECIFIED ONLY*

PURPOSE Provide bounded trust guarantee supported by operations
USE WHEN Fear of poor service blocks conversion
AVOID WHEN Guarantee cannot be honored
REQUIRED EVIDENCE / CONDITIONS Quality assurance, complaint, reserve and terms
PREFERRED LINE / MOVES A38, A45; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Safe outcomes and resolved remedies verified
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M42 Nonexclusive Channel Test | *MOVE / SPECIFIED ONLY*

PURPOSE Preserve optionality before granting territorial rights
USE WHEN Partner asks exclusivity
AVOID WHEN No credible value or legal review
REQUIRED EVIDENCE / CONDITIONS Defined pilot region, term and exit
PREFERRED LINE / MOVES A21, A22; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Evidence for or against later exclusivity
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M43 True Contribution Rebuild | *MOVE / SPECIFIED ONLY*

PURPOSE Recompute margin including every real cost
USE WHEN Scale/campaign reported success is suspect
AVOID WHEN Invoices or partner costs missing without disclosure
REQUIRED EVIDENCE / CONDITIONS Source ledger, refunds, incentives and unit basis
PREFERRED LINE / MOVES A46, A47; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Auditable incremental contribution range
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M44 Downside/Payback Scenario | *MOVE / SPECIFIED ONLY*

PURPOSE Stress test campaign and rollout economics
USE WHEN Large budget or costly human missions proposed
AVOID WHEN Future benefits described as certain
REQUIRED EVIDENCE / CONDITIONS Assumptions, adverse scenarios, exit costs
PREFERRED LINE / MOVES A46, A16; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Bounded exposure and explicit stop threshold
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M45 Retention/Trust Diagnosis | *MOVE / SPECIFIED ONLY*

PURPOSE Analyze why initial users stop returning
USE WHEN High conversion with falling repeat use
AVOID WHEN Attribution data missing or user privacy invalid
REQUIRED EVIDENCE / CONDITIONS Retention cohort, support complaints, quality outcomes
PREFERRED LINE / MOVES A31, A48; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Actionable true churn causes
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M46 Controlled Cohort Expansion | *MOVE / SPECIFIED ONLY*

PURPOSE Increase volume only after stable pilot
USE WHEN One cohort shows promising repeatability
AVOID WHEN Delivery capacity unverified
REQUIRED EVIDENCE / CONDITIONS New-cohort budget, supply and holdout plan
PREFERRED LINE / MOVES A25, A49; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Scale gate re-evaluated on new sample
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M47 Marginal Return Test | *MOVE / SPECIFIED ONLY*

PURPOSE Measure incremental gain rather than average reports
USE WHEN Channels scale and efficiency drops
AVOID WHEN No attribution basis
REQUIRED EVIDENCE / CONDITIONS Cohort definitions, control or comparable baseline
PREFERRED LINE / MOVES A47, A49; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Capped incremental ROI reported
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M48 Channel Mix Diversification | *MOVE / SPECIFIED ONLY*

PURPOSE Try alternate routes against true incumbent channel performance
USE WHEN One channel saturating or dependent
AVOID WHEN Diversification hides low-quality leads
REQUIRED EVIDENCE / CONDITIONS Distinct audience overlap and true cost
PREFERRED LINE / MOVES A20, A25; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Qualified yield improving with diversified risk
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M49 Root-Cause System Correction | *MOVE / SPECIFIED ONLY*

PURPOSE Fix systemic loss rather than run more outreach
USE WHEN Repeated fulfillment or conversion errors
AVOID WHEN Causality is only inferred from one episode
REQUIRED EVIDENCE / CONDITIONS Incident patterns, owner, controlled intervention
PREFERRED LINE / MOVES A33, A50; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Repeat failure declines in independent cohort
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M50 Transferability Test | *MOVE / SPECIFIED ONLY*

PURPOSE Challenge a method in unfamiliar market conditions
USE WHEN Replication proposed beyond known archetype
AVOID WHEN Model assumes language/culture/institutions constant
REQUIRED EVIDENCE / CONDITIONS Held-out region, local evaluation, failure criteria
PREFERRED LINE / MOVES A51, A52; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Supported and unsupported transfer boundaries recorded
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M51 Local Compliance/Language Pilot | *MOVE / SPECIFIED ONLY*

PURPOSE Test regional adaptation with local authority
USE WHEN Expansion into new geography
AVOID WHEN No qualified legal and linguistic route
REQUIRED EVIDENCE / CONDITIONS Native review, regional rules, consent
PREFERRED LINE / MOVES A28, A53; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Local conduct/quality gate passed
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M52 Partner Enablement Kit | *MOVE / SPECIFIED ONLY*

PURPOSE Construct repeatable tools partners can actually use
USE WHEN Partner wants scalable market motion
AVOID WHEN Claims not reviewed or kit not tested
REQUIRED EVIDENCE / CONDITIONS Training, scripts, service level, qualification
PREFERRED LINE / MOVES A23, A54; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Partner independently performs compliant test
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M53 Scale Release Gate | *MOVE / SPECIFIED ONLY*

PURPOSE Compare expansion readiness to actual risk
USE WHEN Portfolio wants bigger launch
AVOID WHEN One metric overrides trust or margin
REQUIRED EVIDENCE / CONDITIONS All MP1–MP7 and local gate evidence
PREFERRED LINE / MOVES A55, A16; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Signed decision with bounds, stage, stop rule
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M54 Pivot Hypothesis Draft | *MOVE / SPECIFIED ONLY*

PURPOSE Create alternative market unit while preserving past learning
USE WHEN Core thesis fails yet assets remain
AVOID WHEN Pivot appears as unsupported “success” narrative
REQUIRED EVIDENCE / CONDITIONS Failure record, new job and alternatives
PREFERRED LINE / MOVES A15, A56; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION New falsifiable thesis, not recycled optimism
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M55 Pause/Remediate Intervention | *MOVE / SPECIFIED ONLY*

PURPOSE Stop unsafe/unlawful/false-return activity and protect participants
USE WHEN Consent, safety, quality, economics or rights fail
AVOID WHEN Must not delay immediate safeguards for experiments
REQUIRED EVIDENCE / CONDITIONS Incident evidence, active campaigns, owner
PREFERRED LINE / MOVES A43, A57; select channel and current authorized execution binding.
WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.
DONE WHEN / VERIFICATION Affected activities stopped and harm resolved
WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.
PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

H-M56 Outcome Readback | *MOVE / SPECIFIED ONLY*

PURPOSE Verify the promised result in authoritative sources

USE WHEN Reported campaign or transaction outcome

AVOID WHEN Dashboard event is not actual fulfillment

REQUIRED EVIDENCE / CONDITIONS CRM + payment/support or other governing evidence

PREFERRED LINE / MOVES A58, A59; select channel and current authorized execution binding.

WHO DECIDES / EXECUTES Assigned Agent, specialist or Market Architect; effectful step requires principal authorization.

DONE WHEN / VERIFICATION Realized outcome and attribution logged once

WORKED ILLUSTRATION Example: run with synthetic or explicitly consented case data and record both supporting and negative evidence.

PIONEER'S NOTE A Move is not complete just because a message was sent or a form submitted.

15 Market Gambits — bounded give/get

A Gambit intentionally gives up money, time, exclusivity, access, margin or choice to gain credible market progress. Each has an explicit maximum loss, alternative, authority and verification. An agent can model gambits but cannot authorize them because a workflow exposes an action button.

H-G01 Concierge service for learning | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Free/high-touch onboarding time | GET: Revealed activation barriers and defensible first-value proof | MAX LOSS: Staff hours × capped users | FALLBACK: Stop concierge; ordinary self-serve pilot

WHO DECIDES / EXECUTES Program sponsor

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G02 Paid design partner discount | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Discounted first paid pilot | GET: Reliable adoption and joint reference only with permission | MAX LOSS: Approved price discount | FALLBACK: Standard paid pilot offer

WHO DECIDES / EXECUTES Commercial sponsor

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G03 Local community seed grant | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Capped event or community budget | GET: Authentic participation and market intelligence | MAX LOSS: Cash grant + operating costs | FALLBACK: Independent research instead

WHO DECIDES / EXECUTES Community + finance owner

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G04 Limited reseller incentive | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Short-term referral revenue share | GET: Qualified verified activated buyers | MAX LOSS: Capped commissions | FALLBACK: Direct sales route

WHO DECIDES / EXECUTES Partner signatory

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G05 Supply readiness guarantee | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Pay for reserved local capacity | GET: High-quality matching / availability | MAX LOSS: Reservation minimums | FALLBACK: Smaller service zones

WHO DECIDES / EXECUTES Operations + finance

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G06 Introductory price staircase | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Lower initial price before value demonstration | GET: Learning on adoption and renewal willingness | MAX LOSS: Discount plus churn risk | FALLBACK: Fixed price test

WHO DECIDES / EXECUTES Pricing owner

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G07 One-neighborhood exclusivity | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Temporary bounded territory preference | GET: Trusted local partner commitment and coverage | MAX LOSS: Foregone alternative partners | FALLBACK: Nonexclusive pilot

WHO DECIDES / EXECUTES Legal + partnership owner

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G08 Partner co-marketing investment | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Provide field/content/event resources | GET: Productive co-created channel | MAX LOSS: Labor + media + cash cap | FALLBACK: Single-company pilot

WHO DECIDES / EXECUTES Marketing sponsor

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G09 Manual service bridge | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Operate interim labor-intensive delivery | GET: Proof demand while tooling matures | MAX LOSS: Labor deficit and service liability | FALLBACK: Park onboarding

WHO DECIDES / EXECUTES Operational sponsor

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G10 Beta guarantee / risk reversal | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Bounded remedial service obligation | GET: Reduce justified buyer fear | MAX LOSS: Reserve / refund exposure | FALLBACK: No guarantee; proof-first offer

WHO DECIDES / EXECUTES Finance + Legal

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G11 Micro-market subsidy | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Time-boxed provider/user incentive | GET: Establish two-sided liquidity and learning | MAX LOSS: Total subsidy and adverse-selection cost | FALLBACK: Smaller matching market

WHO DECIDES / EXECUTES Marketplaces sponsor

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

H-G12 Open research / public benchmark | *GAMBIT / CANDIDATE*

PURPOSE Exchange a bounded concession for a larger, testable market advance.

USE WHEN The proposed get has decision-relevant value and the mechanism has been independently modeled.

AVOID WHEN Evidence is weak, gain is purely vanity, participant value is doubtful, or the loss cannot be bounded.

REQUIRED EVIDENCE / CONDITIONS Versioned offer/terms; modeled gain/loss, end date, legal/ethical check, named approver.

PREFERRED LINE / MOVES GIVE: Share selected anonymized method findings | GET: Ecosystem trust and market participation | MAX LOSS: Research/IP disclosure cost | FALLBACK: Private cohort report

WHO DECIDES / EXECUTES Research/editorial board

DONE WHEN / VERIFICATION Concession stops at cap and incremental learning or market outcome is verified.

WORKED ILLUSTRATION Illustrative candidate; no customer-specific economic forecast is asserted.

PIONEER'S NOTE Every market Gambit requires explicit contingency and a truthful accounting of participant value.

16 Actions — the auditable operating layer

ID	ACTION / TASK	COMPLETION EVIDENCE
H-A01	Register Market Position version	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A02	Record consented field observation	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A03	Store source and provenance	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A04	Code interview/probe evidence	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A05	Reconcile competing hypothesis evidence	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A06	Validate permitted evidence access	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A07	Observe source event and freshness	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A08	Create archetype/role segmentation	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A09	Map named market institutions	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A10	Create comparable territory economics	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A11	Construct low-risk commitment option	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A12	Receive outcome and legitimate opt-out	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A13	Recruit participants under approved protocol	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A14	Confirm external trigger and safe cutoff	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A15	Prepare decision alternatives	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A16	Route decision/approval	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A17	Record switched user cost and reason	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A18	Create scoped partner engagement	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A19	Record recipient permission and contact ownership	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A20	Audit partner-qualified access	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A21	Prepare partnership terms and authority check	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A22	Review partner legal/compliance constraints	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A23	Approve accurate claim/creative versions	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A24	Record comprehension response	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.

H-A25	Launch capped test and cohort assignment	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A26	Prepare buying-committee decision map	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A27	Classify objection evidence	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A28	Create human field Mission	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A29	Verify Market Architect capability and eligibility	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A30	Deliver safe pilot output receipt	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A31	Observe permitted activation events	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A32	Assess source-specific conversion failures	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A33	Publish tested product/onboarding change	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A34	Publish approved price test	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A35	Set event consent, venue and staffing	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A36	Conduct accessible permitted event	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A37	Reconcile event-to-buyer follow-up	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A38	Operate manual fulfillment episode	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A39	Reconcile payment, delivery and complaints	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A40	Approve design partner agreements	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A41	Check provider capability/credential proof	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A42	Track completed supply–demand match	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A43	Throttle unsafe/unprofitable demand	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A44	Record supply-side incidents and quality	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A45	Verify offered remedial guarantee	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A46	Recompute full net contribution	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A47	Report incremental effects with uncertainty	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A48	Analyze retention/cohort evidence	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A49	Approve experimental channel budget	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.

H-A50	Verify recurring process correction	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A51	Activate held-out local study	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A52	Score geographic transfer limitations	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A53	Validate local language/compliance claims	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A54	Publish partner operating package	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A55	Authorize staged market scale	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A56	Log pivot and competing hypothesis	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A57	Suspend activities and revoke access	Valid linked artifact, responsible actor, time, source version and receipt. Requires material human or system authorization before effect.
H-A58	Fetch authoritative effect receipt	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A59	Record verified outcome and ledger attribution	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.
H-A60	Finalize case closure and review	Valid linked artifact, responsible actor, time, source version and receipt. Read-only or administrative effect within permitted scope.

Compilation and effect verification

Actions such as “send an approved creative,” “place a paid order,” “grant partner status,” and “authorize regional scaling” require real effect receipts. A POST response or submitted draft is not proof of changed market behavior. Every invocation must support idempotency, version checks, cancellation, partial completion and postcondition readback.

17 The exploration, experiment and campaign engine

Every market-facing action is treated as (i) observation, (ii) research to reduce consequential uncertainty, (iii) controlled intervention to change a Position or (iv) operational delivery of verified customer value. Campaigns can be scientific experiments, relationship development, transactions or systems-building work; they should not be flattened into advertising automations.

Operating ownership (v0.2): a Campaign Manager owns the Experiment/Campaign Case and the controlled treatment, not the seven-axis Market Position. It can branch or pause inside the approved Line, but a material strategy, population, offer, budget or market-thesis change returns to the Market Manager for a new Review and authorization. An Experiment Review can establish campaign facts without purporting to establish market-wide causal truth.

17.1 The Experiment Contract

FIELD	REQUIRED CONTENT
Principal and market unit	Named beneficiary, offer, archetype, region, channel, time window and excluded groups
Hypothesis / counter-hypothesis	What causal mechanism is expected; what rival explanation would falsify it
Decision to be improved	Scale, reframe, stop, invest in supply, revise offer, move to next stage
Observation and intervention	What exactly changes, to whom, when and compared with what baseline
Outcome hierarchy	Exposure → qualification → real commitment → delivery → retention → contribution
Diligence and sample	Recruitment, selection effects, fairness, data rights, negative cases and confidence
Budget and failure cap	Money, Market Architect hours, contact frequency, safety thresholds and authority
Assignments	Execution owner, participant engagement, independent evaluator and escalation
Event and verification	Provenance, raw evidence reference, authoritative outcome, time and revisions
Disposition	ACTIVATE / REPEAT / REVISE / BUILD / EXPAND / PARK / STOP and next checkpoint

17.2 Adaptive diligence and sequencing

Rigorous exploration is neither endless fact-gathering nor a rigid minimum interview count. Decide what to verify next by consequence, evidence reliability, irreversibility, urgency, available alternatives, population heterogeneity, cost of error and the expected decision value of additional information. Interviewing three founders to decide whether to test a $500 landing page is different from authorizing a six-figure city launch, offering financing, publishing competitive rankings or involving children. Sequence desk research → permitted source validation → representative field contact → behavioral action → delivery → longitudinal outcomes where feasible, but skip low-value steps when current authoritative evidence is already sufficient.

Use a DILIGENCE DECISION: baseline known? risk tier? sources authoritative? sample adequate for intended inference? alternative hypotheses challenged? next evidence worth obtaining? hard gate still open? time to act? The explicit answer may be “do nothing; wait for a material trigger.”

17.3 Market Worlds and synthetic simulation

Hipstraw Labs needs deterministic kernels for economics, buyer groups, geographic density, available supply, lead times, budgets, price, cancellations and fulfillment where these can be specified. Other participant agents—buyers, sellers, community leaders, distribution partners, creators, regulators and competitors—operate with partial information and plausible incentives. Models can invent candidate Moves, but worlds must contain independent rules, real constraints, diverse behaviors and disconfirming scenarios.

WORLD FAMILY	FUNDAMENTAL TEST	ADVERSARIAL SHOCK
New category adoption	Does education generate real changed behavior?	Curious audiences never migrate from old workaround
B2B enterprise vertical	Can champion convert a committee with budget?	Security veto and missing technical compatibility
Fragmented local services	Can trust and supply reliability produce repeat paid value?	Provider cancellations and refunds surge
Two-sided cold start	Can seeding produce sustained liquidity?	One side accepts subsidy but exits on reprice

Regional expansion	Does doctrine transfer across a different context?	Local language, access or institutional rule differs
Channel/creator-led	Is partner audience incremental and relevant?	Fraudulent followers and deal attribution collision
Industry distribution redesign	Can dealers/distributors participate without channel conflict?	Incumbent contract restrictions / partner non-cooperation
Scale and unit economics	Can net contribution survive adverse cohort mix?	CAC doubles, labor cost increases and retention halves

Simulation results are lab-qualified only. Rehearsal uses holdouts, varied scenarios rather than prompt paraphrases, fixed and randomized seeds, explicit baselines, intervention cost, independent evaluators and zero-intervention alternatives. The field dossier must state transfer limits and where simulations failed.

17.4 The Pioneering Portfolio

Every prospective Market Position is a real option. A portfolio includes EXPLORE, SEED, BUILD, SCALE, PARK, RETIRE and WATCH dispositions; minimum next evidence, option value and cost-to-learn; dependencies; responsible Market Architect coverage; expected investment and exposure cap; likely follow-on route; and expected time of next material signal. A “100 markets in 100 days” research program can be useful if each unit is defined, tests are truly bounded and an honest stop is valued. It should not promise 100 successful markets or substitute campaign volume for verified market creation.

18 Living market instruments and experiences

The Addendum B-inspired distinction applies directly to market work: a Move is professional intent; an Instrument is a typed market artifact; an Experience is its role-appropriate surface; an Engagement obtains accountable information or commitment; and a Case is its continuing episode. Every material interaction needs a precise purpose, source context, permission, time policy, respondent options and verifiable disposition.

INSTRUMENT LIBRARY	CORE HIPSTRAW INSTRUMENTS	BUSINESS FUNCTION
Research and market intelligence	Territory Map, Archetype Brief, Market Thesis, Opportunity Review, Contrary Evidence Memo, Research Update, Market Position Report, State-of-Market	Understand the market and organize responsible attention
Market intervention and offers	Concept Test, Pilot Offer, Partner Proposal, Market Access Request, Incentive Schedule, Localized Offer, Service Guarantee	Change access, participation, commitments and economics
Coordination and human fieldwork	Market Architect Mission, Consent Protocol, Interview Guide, Observation Form, Evidence Request, Assignment, Approval, Exception, Field QA	Get situated evidence and accountable safe work
Attention, temporal and case	Pioneer Brief, Opportunity Watch, Trigger Alert, Next Experiment Request, Cutoff Notice, Engagement Commitment, Story-So-Far	Keep effort timely, proportionate and traceable
Campaign, program and cohort	Campaign Charter, Experiment Card, Campaign Midpoint, Program Weekly Report, Participant Check-in, Learning Brief, Final Market Report	Manage bounded interventions and shared learning
Institutional evaluation and management	Market Portfolio Review, Strategy Tournament, Method Card, Scale Gate, Quarter-in-Review, Mastery Release, Benchmark Dossier	Assure competence and institutional accumulation

18.1 Canonical instrument contract

For each instrument: artifact ID/version and type; originator and principal; market Position/Case/Program references; role and intended recipients; permitted data; factual findings versus interpretations versus hypotheses; source time, effective time and access rights; requested response; authority and binding status; materiality; financial and human cost; deadline and decision cutoff; current state, log and immutable transition history; postconditions and verification.

18.2 Progressive market review experience

GLANCE → BRIEF → REVIEW → DEEP INVESTIGATION → EVIDENCE DOSSIER. The initial view surfaces what changed, why it matters, what is known and unknown, next admissible intervention and cost of delay. A reviewer can drill to transcript excerpt with consent, observed

cohort, offer version, geographic map, experiment design, budget or participant mission. An executive should not be required to read twenty interview transcripts to approve a two-hour reconnaissance task.

18.3 Engagement and field-question policy

Before interrupting a person, the agent checks accessible permitted records, identifies the smallest decision-relevant gap, chooses the accountable participant and explains why the answer changes a decision. Allow “I do not know,” “not applicable,” evidence correction and dissent. A researcher should not repeatedly ask local merchants to restate what an authorized census or prior field mission has already established. One open equivalent request by the same principal should ordinarily be reused; after decision cutoff, escalation can occur only through approved channels.

18.4 Surface spectrum

SURFACE	USE	BOUNDARY
Micro-widget	Market signal, review finding, contact/task decision	Server checks actual permission/current version
Expandable host experience	Interview evidence, pilot offer, source-linked opportunity review	Stay in CRM, agent platform or product workspace
Owned Hipstraw workspace	Portfolio, Missions, Campaigns, market Cases, program/cohort content	Does not replace every source system
External secure-link experience	Participant research, partner negotiation, structured responses	Scoped permission, no mandatory Hipstraw account
Agent-native typed artifact	A2A/MCP/REST result, case state and follow-on request	Host cannot infer right to act from schema rendering
Mobile Market Architect field experience	Mission steps, local navigation, check-ins and evidence receipts	Offline operation, safe collection and minimized data

19 Federated execution and market capability fabric

Hipstraw should be accessible without requiring customers to replace CRM, campaign automation, product analytics, email, commerce applications or existing generalist agents. External hosts can invoke Hipstraw capabilities and receive scoped findings, artifacts, continuing tasks, field Missions, participation events and verified outcomes. Conversely Hipstraw may request approved effects in those host systems. The semantic capability survives whether delivery occurs in Hipstraw, via a partner application or through a human field specialist.

Cross-level protocol (v0.2): external and internal invocations use the same Objective Assignment, Line Invocation, Mission Order, Impact Signal and Outcome Event semantics. A2A/A2S carries typed roles, capability version, scope and receipts; A2P/A2C additionally requires participant benefit, minimal burden, privacy, consent and conduct. Transport success is not an observed market effect.

19.1 Four interaction grammars and host channels

GRAMMAR	INTERACTION	ILLUSTRATION
A2A — agent-to-agent	Bounded task delegation, case ownership, events and responses	External growth agent delegates a regional demand study
A2S — agent-to-service	Typed assessment, calculation or controlled tool execution	Evaluate opportunity economics or launch approved test
A2P — agent-to-person	Adaptive, humane evidence requests, micro-decisions and consent	Ask consenting Market Architect to verify local behavior
A2C — agent-to-counterparty	Market partner, business owner or creator exchange with clear terms	Send a partner proposal or request explicit participation
App-to-Agent and App-to-Service	CRM, platform or application invokes research and managed work	Host CRM attaches Market Position and callbacks
Embedded / owned experience	Human interaction with common instruments and ledgers	Pilot-offer and field-review widgets

19.2 Capability discovery registry

LEVEL	PROPOSED CAPABILITIES	OPERATING SEMANTICS
1 / Assessment	market.map_territory, opportunity.assess, audience.validate, channel.audit, economics.evaluate	Mostly evidence-based advisory; typed uncertainty
2 / Instrument	experiment.design, field_mission.prepare, offer.test, partner.proposal, market_brief.compile	Drafts and structured decisions; not binding
3 / Managed work	market.investigate, experiment.run, campaign.manage, field_mission.execute, market.case_pursue	Accepted task/case, deadlines, callbacks, verification
4 / Effectful	campaign.launch, permitted_contact.send, partner_invite.issue, host_offer.publish, spend_gate.apply	Only certified binding and current authorization
5 / Faculty mandate	market.position_steward, acquisition.review, scale_gate.manage, quarterly_market_review	Persistent, scoped responsibility with human oversight

19.3 Capability request and response contract

Request: request_id; tenant and principal; market_position_id; capability/version; authorized evidence refs; intended effect; mode (read-only/advisory/managed/approved effect); geography; recipients; spend/human-time cap; consent status; idempotency_key; callback subscription; deadline and cancellation conditions. Response: accepted/running/input-required/blocked/completed/verified; task/case ref; versioned Market Brief; evidence/uncertainty and contraindications; next permissible Move; cost consumed; binding effect; independent proof reference.

Effect handoff: (1) Hipstraw constructs precise action request; (2) owning host independently checks authority, allowed recipient, current cohort and budget; (3) host acts or declines; (4) immutable effect receipt returned; (5) Hipstraw checks downstream market outcome, not merely the API response. A failed webhook or duplicate retry cannot send the same prospect multiple unconsented messages. Revoked authority stops follow-up.

19.4 Integration responsibilities and assurance

RESPONSIBILITY	COMPETENCE	FIELD VALIDATION
SOURCE	Read permitted CRM, commerce, analytics, mail, research and partner evidence	Correct subject IDs, source versions and user grants
OBSERVE	Track consent and behavior events and source changes	At-least-once event deduplication, time and freshness
ACT	Execute only permitted host effect with object versions and cap	Authorization, idempotency and reversal path
ENGAGE	Route accountable human/partner questions and responses	Correct recipient, benefit, no duplicate interruption
VERIFY	Reconcile actual purchase, delivery, retention, margin, trust and quality	Independent readback with receipt and late-effect tracking

19.5 Reliability failures to rehearse

INJECTED FAULT	REQUIRED RESPONSE
Duplicate campaign launch callback	Idempotent single launch or safe reconciliation; no repeated sends
Source CRM contact withdrawn consent	Stop affected outreach and sync suppression state
Partner reports 1,000 leads but only 60 eligible	Return qualified and unknown counts; do not invent conversion
Market Architect goes offline mid-assignment	Explicit waiting state, worker safety check and reassignment rules
Offer price changes during experiment	Version conflict; segment reports by treatment actually seen
Regional legal restrictions change	Pause affected activity and obtain qualified local advice

Provider accepts booking but later cancels	Mark delivery failed/pending; restore customer and update Position
Partner agent requests confidential competitor data	Deny cross-principal access; auditable boundary
Synthetic evaluation mistaken for real field data	Block external performance claim until corrected
High acquisition but negative true contribution	Trigger economic stop; preserve customer remedies

20 The Hipstraw human Market Architect network

Hipstraw owns and operates its own agent capabilities and human Market Architects. Humans may be full-time professionals, contracted field specialists or flex members activated for suitable, compensated Missions. The organizing idea is a single Hipstraw service—not a separately branded "bench"—capable of developing markets by coordinating real-world access, research, relationships, creation and reliable interventions. Legal classification and worker terms must reflect actual jurisdictional control and employment facts.

20.1 Human roles and capability tiers

ARCHETYPE	CAPABILITIES	QUALIFICATION / ADVANCEMENT
Market Scout	Neighborhood audits, local mapping, contextual research	Safety induction → observation QA → verified field consistency
Research Architect	Interview design, impartial probing, synthesis and evidence	Ethics practice → supervised interviews → independent coding review
Vertical Market Architect	Specific category knowledge, buyers, buying roles and competitors	Domain cases → field results → transfer tests
Partnership Architect	Associations, dealers, distributors, ecosystem and local trust	Relationship and economic due diligence → co-selling controls
Market Activation Producer	Events, creator partnerships, video, campaigns, community	Disclosure and brand safeguards → qualified outcome evidence
Supply/Service Architect	Provider recruitment, readiness, localized fulfillment and assurance	Credential verification and operational reliability → escalation mastery
Regional Market Lead	Language, culture, local institutions, market portfolio and people	Cross-archetype operating judgment → managed authority
Field Quality and Safety Reviewer	Consent, evidence integrity, bias, fraud and worker care	Independent calibration and adverse-case drills

20.2 Market Architect profile and résumé

A capability résumé records role and regional/language coverage; verified sector familiarity; prior Missions by type and complexity; observed accuracy, on-time delivery, consent handling, participant satisfaction, safety incidents, difficult-case resolution, training worlds attempted, strengths and contraindications. Reputation must not simply reward mission count or respondent conversion: honest "no demand," safe stops and correctly reported uncertainty are positive evidence of professionalism.

20.3 Mission lifecycle

STATE	REQUIRED RECORD	IMPORTANT STOP
PROPOSED	Principal, market unit, evidence gap, permitted venue/channel, outcome	No assignment without useful purpose
SCOPED	Diligence, expected minutes, worker compensation, privacy and safety plan	No indefinite or hazardous work
ASSIGNED	Qualified worker, localized instructions, conflicts and expiry	Withdraw if worker no longer eligible
ACTIVE	Check-ins, time, consent, field claims and usable evidence	Unsafe site or respondent refusal stops relevant action
SUBMITTED	Versioned observations, negative findings and source/receipt	Do not reward fabricated positive results
QUALITY REVIEW	Independent audit or spot checks, disagreement and corrections	Quarantine questionable evidence
ACCEPTED / REJECTED	Sufficiency and fair payment status	Never withhold lawful earned compensation as a scoring tactic
CLOSED / REOPENED	Outcome/case linkage, learning and follow-up rights	Reopen when proof contradicted

20.4 Incentives and network economics

Pay for defined professional service and responsibly completed mission deliverables—not solely for leads, interviews that support a favored thesis or pressured purchases. Measure gross margin by Mission after planning, travel, compensation, quality review, safety, translation, specialist and platform costs. Maintain transparent worker earning terms, local tax/insurance checks, fair cancellation and dispute mechanisms, and clear boundaries for agent-delegated instructions. Treat responsible refusal, negative findings and participant trust as part of quality.

20.5 Field operations case: local merchant discovery

Synthetic pilot: a regional market lead dispatches four trained Market Scouts to map independent home-service providers across a neighborhood cluster. They use a consent-first scripted introduction; gather permissible service categories, capacity and booking preferences; log refusal without pressure; and submit standardized source-linked summaries. A different reviewer samples records, detects duplicate merchants and conflicts, and reports coverage limitations. Only verified and permissioned providers may be invited into a commercial pilot. A discovered unsafe operation triggers an appropriate stop; it is not silently scored as a qualified lead.

21 Eight end-to-end market pioneering cases

Every case in this section is an invented teaching world. Numbers, characters, businesses, conversion results and decisions are illustrative test material, not actual Hipstraw client achievements or forecasts. Each case demonstrates multiple permissible Lines and shows how changing evidence changes the recommended intervention.

CASE 01 / B2B vertical SaaS opportunity

World and trigger. A generic agentic operations product seeks a compelling market among U.S. Series B/C companies. Desk research suggests many possible buyers. Ten exploratory conversations include five enthusiastic CIOs but none can name a budget. Three revenue-operations leaders describe a concrete recurring exception-management burden.

Position and choice. MP1 SUPPORTING for one job; MP2 ACCESSIBLE in RevOps, not CIO; MP3 HYPOTHESIZED; MP4 UNTESTED; MP6 UNKNOWN. Stance Listen → Probe. Strategy H-S03 Prioritize a wedge and H-S06 first commitment. Play H-P04 Vertical Wedge and H-P02 Behavior.

Opening → middlegame → endgame. H-L01 map actual people and substitute workflows → H-L03 select RevOps pilot wedge → H-M24 Buying Committee Map → H-L07 seek two paid or clearly sponsored design partners. Develop a case with existing records only after approval; do not interpret an informal buyer “yes” as commitment.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
CIO interest stays high but no operator endorses pain	Re-evaluate persona; avoid executive vanity metrics
One customer wants fully bespoke solution	Scope a reusable narrow outcome and account for customization cost
One buyer signs pilot but lacks access to data	Use synthetic evidence; return to authority map
Two pilots show measurable adoption and budget	Consider H-L10 independent cohort test before expanding

Closure proof and what the case teaches

Verified result requires recurring user behavior, sponsor authorization, acquisition and delivery economics; not merely signed discovery agreements.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

CASE 02 / Bengaluru neighborhood home services

World and trigger. A concept for AI-assisted booking of appliance repair meets anecdotal enthusiasm from local households. Provider listings exist, but it is unclear who can arrive reliably, what price is trusted and whether WhatsApp is a permissible route for particular users.

Position and choice. MP1 HYPOTHESIZED; MP2 INTERESTED but under-sampled; MP4 uncertain; MP5 FRAGILE; MP6 UNKNOWN. Stance Scout → Build only after supply gate. Strategies H-S04 access, H-S09 transaction and H-S11 liquidity.

Opening → middlegame → endgame. Deploy H-L17 consented Market Architect Mission for observations; verify ten providers’ eligibility, coverage and real availability using H-M38; run H-L11 constrained balance; test opt-in conversation flow under applicable messaging rules. Begin with a few user-requested bookings and real support.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
Provider repeatedly cancels	Stop promotion and fix capacity before acquiring more buyers
Customers ask for price assurance	Test real transparent quotes / funded remediation guarantee
Chat group membership offered as audience	Do not equate membership with lawful marketing consent
Three completed orders get praise but no repeats	Continue longitudinal validation; no scale claim

Closure proof and what the case teaches

Validate paid fulfilled bookings, service quality and complaint resolution, local unit economics and repeat use without promotional distortion.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

CASE 03 / Independent salon market development

World and trigger. An equipment vendor wants to reach fragmented independent salons in a mid-sized U.S. metro. Paid online campaigns generate clicks but little qualified action. Local owners rely on supplier relationships and peer demonstrations rather than cold email.

Position and choice. MP2 INACCESSIBLE online; MP4 WEAK; MP1 possible; MP3 unproven. Stance Scout → Co-create. Strategy H-S04 access and H-S14 trust. Plays H-P07 Street/Trade Access and H-P14 Live Event.

Opening → middlegame → endgame. H-M19 lawful field mapping → H-M18 local warm introductions → H-L04 access bridge → H-M34 small opt-in demonstration. Record equipment cost and actual salon need. Introduce a no-obligation commercial pilot only after consent and published terms.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
Event popular but only other vendors attend	Correct sample, no false success claim
Salons value training more than product	Investigate education-as-product or partner offering
Influencer asks to post fake testimonials	Decline; pursue truthful demonstrations
One distributor asks for exclusivity	Run H-G07 only with approved bounded economics

Closure proof and what the case teaches

Evidence: number of genuinely eligible owner conversations, demonstration-to-paid conversion, satisfaction and partner costs, not footfall.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

CASE 04 / Two-sided local tire-service market

World and trigger. A proposed appointment orchestration platform has demand signals from car owners but only a thin network of tire shops. A paid referral channel promises many bookings. Most shops cannot guarantee appointment windows or track fulfillment through the same technology.

Position and choice. MP1 SUPPORTED, MP5 FRAGILE, MP4 possible, MP6 untested. Stance Build / Protect, not Expand. Strategies H-S09 first transaction and H-S11 liquidity. Play H-P08 Two-Sided Seed and H-P19 Supply/Delivery Balance.

Opening → middlegame → endgame. H-L11 recruit and qualify small shop cohort → define manageable service zones → manually coordinate a limited batch of requested appointments with H-M36 → verify actual completion and no-shows → measure service economics and cancellation impact.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
Shop claims 30 slots but accepts only 5	Update real capacity; do not list phantom availability
Customers book and never arrive	Investigate deposit, reminders and no-show economics with transparent rules
Partner requests prepaid national campaign	Reject until G2/G3 service and contribution gates
One shop repeatedly fails service quality	Suspend that supply source and protect customers

Closure proof and what the case teaches

Matching activity is not market liquidity until jobs complete, customers receive value and both sides have sustainable economics.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

CASE 05 / New-category creator-led market

World and trigger. A consumer product introduces a service users do not know they can ask for. Creator videos draw hundreds of thousands of views but usage and paid conversion are weak. The founder proposes doubling sponsorship spending.

Position and choice. MP1 UNPROVEN; MP2 broad low-quality; MP3 not understood; MP4 apparent reach but weak conversion; MP6 likely uncertain. Stance Probe. Strategies H-S05 intelligibility and H-S12 economic integrity. Plays H-P12 Education and H-P29 Creator Fit.

Opening → middlegame → endgame. H-M26 assess active audience segment, disclosures and authentic engagement → H-M22 test clear problem-language variants → H-L06 request a meaningful trial or payment in a bounded cohort → measure activation and repeat behavior under H-L12.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
High reach persists but no sign-ups	Do not buy more views; adjust segment or stop
Viewers understand but cannot receive service	Address supply/fulfillment not message
Creator followers include mostly irrelevant geographies	Reclassify qualified reach and channel value
Independent channel yields higher-quality buyers	Diversify; do not reward influence vanity

Closure proof and what the case teaches

Report incremental qualified acquisition cost and delivered customer value, with explicit exclusions for inferred reach.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

CASE 06 / Industrial distributor market redesign

World and trigger. A manufacturer with a long-established distributor network considers a digital replenishment and field-support service. Existing dealers worry that manufacturer-direct software will cannibalize their relationships. The opportunity may require restructuring incentives and workflows, not just launching an app.

Position and choice. MP1 probable need; MP2 accessible through dealers; MP5 structurally constrained; MP6 model required. Stance Listen → Co-create. Strategies H-S08 Channel Leverage and H-S14 Partner Loop. Play H-P21 Partner Economics and Governance.

Opening → middlegame → endgame. Map manufacturer/dealer/end-user positions separately, document channel conflicts, test a partner-led workflow in one territory, design reciprocal terms and training, include no-action baseline, and pursue signed authority before changing access or customer relationships.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
Dealer rejects sharing customer data	Use scoped joint outcomes or remove case; no data coercion
End-users love app but dealer economics deteriorate	Pause expansion; redesign incentives and attribution
Manufacturer wants exclusive terms for all dealers	Pilot nonexclusive or limited route with Legal
One dealer sees improved service and reorder rates	Test transfer across unlike dealers before scale

Closure proof and what the case teaches

A validated market system improves combined customer/service economics without misappropriating channel relationships.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

CASE 07 / A cross-border B2B market-entry program

World and trigger. A U.S. software company explores entering Southeast Asia using a generic English-language campaign. Responses vary dramatically by country. Procurement routines, buyer identities and partnership expectations differ, and a local consultant claims the market is ready.

Position and choice. MP2/MP4 localized and disputed; MP5 institutional unknown; MP6 unmodeled. Stance Scout. Strategies H-S13 legitimacy and H-S15 expansion, but G4 not met. Plays H-P05 Local Context Translation and H-P27 Geography Transfer.

Opening → middlegame → endgame. H-L13 local institution map → qualified language/legal review → field conversations by specific industry/country → narrowly localized pilot with one credible partner → comparison of customer value, buyer decision path and unit economics against home-region baseline.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
Country-level rules prohibit campaign route	No launch; ask local counsel for lawful alternatives
Local consultant reports “large pipeline” with no IDs	Classify as unsupported; request source and independent verification
Localized partner requests prepaid exclusivity	Run bounded H-M42 test or decline
First region validates; second does not	Maintain distinct Market Positions; no silent regional rollup

Closure proof and what the case teaches

A cross-border “region” is not a unit of proof. Report by specific buyer, product, route, territory and policy context.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

CASE 08 / Adjacent market test for existing B2B base

World and trigger. A company serving 30 mid-market customers wants an adjoining data-intelligence offer. Executives believe current users will buy because they already trust the firm. Interviews reveal a real use case, but buying authority resides in a different department and data integration is costly.

Position and choice. MP1 SUPPORTED, MP2 DIFFERENT BUYER, MP3 TESTING, MP5 technical burden, MP6 unknown. Stance Probe → Co-create. Strategies H-S06 commitment and H-S15 adjacent expansion. Plays H-P28 Adjacency and H-P17 Consensus.

Opening → middlegame → endgame. H-M13 Adjacent Job Probe → H-M24 decision-role mapping → H-L07 two design partners for a repeatable use case → H-M28 operational proof → H-L12 cost-to-serve and repeatability. Preserve core customer experience and do not conflate cross-sell with net-new demand.

IF THE WORLD CHANGES...	THE REQUIRED SITUATED RESPONSE
Existing buyer offers positive feedback but no budget	Treat as qualitative input, not paid validation
Integration labor is unique to each customer	Narrow supported source systems or reprice
Existing users authorize demo but not data transfer	Use synthetic world; honor permission boundary
Several similar customers pay and achieve outcome	Advance bounded deployment and independent cohort test

Closure proof and what the case teaches

Verify incremental revenue, real delivery cost, retention, separate buyer rights and repeatable outcomes before expansion.

Assurance test: repeat with different buyer behavior, access constraints, timelines, prices, human response rates, legal conditions and counterparty objections. A method that succeeds only in the story above is not qualified mastery.

22 Hipstraw as an institution of Market Mastery

Hipstraw is not a campaign agency with an AI layer and not primarily a marketing workflow platform. It can own a School of Market Mastery, construct deployable Market Faculties, organize autonomous and human Market Architects, execute bounded Programs, conduct Cohorts, expose specialist market capabilities and publish rigorous market research and evaluations. The same method library serves each offering while their buyer, scope, pricing and promises remain independent.

22.1 School, Faculty, Mission, Agent, Program and Cohort are distinct

CONSTRUCT	GOVERNING MEANING
School of Market Mastery	Institutional research and development of market methods, practice worlds, norms, measurement, field evidence and competence releases
Market Faculty	Operational specialization that reviews Positions, runs market-development interventions, manages Missions and Cases, and verifies market outcomes
Faculty Mandate	Principal's bounded grant of market areas, targets, permissions, budget limits, authority, human interface, evaluation and accountable service
Hipstraw Agent	Role or runtime executing bounded discovery, campaign, specialist or learning work under the Faculty
Market Architect	Qualified Hipstraw human able to perform situated field research, negotiation, creation, evaluation and service missions
Program	Finite customer-specific market opportunity, launch, development, activation or scaling outcome engagement
Cohort	Independent multi-participant experimental, learning and peer development experience with appropriate data isolation
Invocable Market Capability	Versioned specialist competence consumed through API, agent delegation, managed case or human-assisted service
Market Instrument / Experience	Living artifact or interaction; rendered in host software, Hipstraw-owned workspace, human mobile or A2A payload
Lab and Assurance	Controlled construction, simulation, comparative evaluation, independent research and public benchmark methods

22.2 Six parallel permanent offerings

OFFERING	WHAT IS SOLD	WHY INDEPENDENT
1 Pioneer Programs	Bounded exploration/development/build/scale intervention with sponsor, baseline, portfolio and deliverables	Buyer wants a defined opportunity or challenge solved without retained Faculty
2 Market Pioneer Cohorts	Shared structured experiments, missions, synthetic worlds, reports and community	Education, research, distribution and learning have intrinsic economic value
3 Persistent Market Faculty	Continuing Market Position reviews, portfolio decisions, campaign/mission stewardship, pursuing verified value	Customer seeks long-running external capability rather than a one-off campaign
4 Specialist Capabilities / Managed Cases	Research, market intelligence, experiment, outreach and partner tools via API/MCP/A2A or human service	Host already owns software/workflow and needs expertise
5 Embedded / Owned Experiences	Research brief widget, Mission console, market workspace, offer/partner instrument studio	Makes capability useful wherever customer works
6 Labs, Evaluations, Benchmarks	Comparative market-system and agent competence studies, simulation worlds, rigorous performance evaluations	Independent evidence and market foresight serve AI labs, investors and enterprise buyers

There is no mandatory sequential funnel. A venture firm may commission a market diligence service without joining a cohort. A platform provider may invoke a narrowly bounded "local market validation" capability. A founder may directly retain a Market Faculty. A local Market Architect can participate in ongoing research Missions without being resold as low-value lead generation.

22.3 Representative market mastery offerings

EXPERIMENTAL OFFER	BUYER	DURATION / OUTPUT (CANDIDATE)
30-Day Market Discovery Sprint	Founder, investor, strategy leader	Territory map, counter-thesis, early field evidence, top wedges
90-Day New Market Pioneer Program	Growth/GM sponsor	Position, qualified access, tested offer, first transactions, scale/stop gate
Local Market Launch Studio	B2C/local services principal	Field architects, initial supply network, test campaign, quality proof
Vertical B2B Opportunity Program	SaaS/product executive	Buyer/committee map, design partner plan, workflow proof
Partner Channel Formation Program	Manufacturer, platform, association	Tested partner cohort, economic exchange, joint experience
Persistent Market Development Faculty	Marketing/strategy executive	Ongoing Reviews, Campaigns, Missions, Case pursuit and Quarterly report
Pioneer Research Cohort	Founders/enterprise innovation teams	Weekly experiments, peer analysis, lab-qualified methods
Market Agent Competence Evaluation	AI lab or platform provider	Independent market reasoning and real-world execution assurance
Market Investment Intelligence	VC/PE/investor operating partner	Opportunity and execution-capacity evaluation; advisory only where required

22.4 Faculty Mandate: what enduring accountability means

MANDATE FIELD	SPECIFICATION
Principal and market orientation	Customer, commercial interests, affiliate boundaries, exclusivity and conflicts
Eligible Market Positions	Products, buyer archetypes, geographies, use cases, channels and time horizons
Approved methods and maturity	Plays/Lines qualified for this context; lab-only and excluded work explicit
Goals and expected outcomes	Need evidence, access, transactions, retention, positive contribution and learning
Financial / commitment authority	Research, campaigns, ads, incentives, partner agreements, pricing and cap approvals
Human missions and conduct	Market Architect hiring/assignment terms, safety, labor, local consent and participant welfare
Systems and data rights	CRM, mail, analytics, research, partners, retention, provenance and cross-client learning rights
Attention and service levels	Review cadence, prompts, alerts, human approval limits, missed-deadline escalation
Evaluation and transparency	Independent audits, experiment registry, confidence, realized outcomes and complaints
Offboarding and portability	Open Cases and Missions, artifact export, partner/customer status, consent and data deletion

Faculty stewardship does not transfer authority to sign agreements, spend outside the approved envelope, send noncompliant messages, hire outside lawful terms, hold customer funds, reuse data, or claim public evidence that is not independently supported. Capability qualification and tenant authorization are separate gates.

22.5 Organizational model

A Hipstraw Market Faculty Executive owns mandate objectives, portfolio decisions and customer outcomes. Research Managers own evidence and opportunity hypotheses; Market Development Managers own channel and activation Lines; Regional/Vertical Architects handle situated operations; Campaign/Mission Coordinators own controlled execution and participant burden; Partner Managers own counterpart relationships; Outcome Assurance owns independent measurement; Labs and Blue Salt Research improve methods and evaluation. One issue/case has one accountable owner. Orchestration does not require excessive multi-agent chatter.

Management clarification (v0.2): a Program Manager owns its finite Program Position and authorized intervention portfolio, while the underlying Market Manager remains accountable for each affected Market Position. A Campaign Manager's concluded experiment is an input to Program and Market Reviews; a Program cannot override independent participant consent, partner contracts or active Case deadlines.

23 Bounded Programs and shared Cohorts

23.1 A ten-week Market Pioneer Program

WEEK	THEME	CUSTOMER-FACING EXPERIENCE	EVIDENCE GATE
1	Charter, target and territory	Program Brief; objectives and existing market map	Market unit and sponsor approved
2	Opportunity hypotheses	Archetype/Jobs map; competing theories	Sample and disconfirming plan
3	Field reality and access	Human missions, interviews and source-linked reports	Truthful first-hand evidence and consent
4	Wedge and offer	Opportunity Review; comprehension and positioning variants	Decision on bounded test, not assumed fit
5	Behavioral experiment	Live controlled pilot/ask; cohort readout	Meaningful response and treatment costs
6	Supply, trust and transaction	Partner/provider plan; customer journey working proof	Real completed value / service quality
7	Channel and economics	Acquisition routes; margin and payback report	Incremental contribution plausible
8	Adversarial expansion rehearsal	Transfer/stress world; alternative Lines	Risk review and explicit conditions
9	Repeatability test	Second cohort or territory proof	Verified gains and caveats
10	Final Market Review	Executive disposition; cases, outcomes, portfolio and next steps	ACTIVATE/BUILD/SCALE/PARK/STOP signed

Customer Program outputs are a durable Program Charter, weekly Market Brief, linked case portfolio, participant questions on individual claims, mid-program sponsor decision, source-provenanced interventions, outcome ledger and final board-level Market Position with follow-through obligations. Changes in scope, channel or spend require a new authorized version.

23.2 An eight-week Market Pioneer Cohort

WEEK	COLLECTIVE LEARNING	PARTICIPANT MISSION / RESEARCH OUTPUT
1	What is a market system?	Synthetic territory; competing candidate opportunities
2	Problems, buyers and substitutes	Field observation in approved context; source reliability worksheet
3	Archetypes, access and trust	Test introduction and value-of-information methods
4	Offers, commitments and category creation	Comprehension experiment; real versus simulated behavior
5	Moves, Lines, Games and Gambits	Multilateral simulated buyer/partner/supplier responses
6	Local market and channel worlds	Market Architect mission scenarios and adverse institutional shocks
7	Economics, delivery and scale	Held-out worlds; contribution, service quality and transfer evaluation
8	Synthesis and next repertoire release	Peer critique, failure reports, shareable research and next questions

Cohorts are permanent first-class offerings with independent research and commercial value, not primarily a method of recruiting software customers. Share fictional worlds or explicitly licensed/anonymized aggregate findings; do not pool customer pipeline or private go-to-market plans by default. Participants may challenge Hipstraw's claims. A disconfirmed Play, responsibly documented, is a valuable scientific result.

23.3 Midpoint Review and follow-through

The Program or Cohort Midpoint Review reports thesis changes, actual versus intended activity, verified market behaviors, participant burden, cost, failures and objections, quality of human Missions, net economics and available alternatives. It requests a bounded sponsor

decision: keep line, change segment, revise offer, reduce scale, intensify verification, pause or terminate. Unsettled customer commitments remain open after a bounded program until an agreed handoff; completion of a final report is not proof of delivered benefits.

23.4 Revenue model experiments and unit economics

OFFERING	POSSIBLE MODEL	WHAT MUST BE PROVEN
Program	Fixed fee, milestone fee or appropriately verified outcome participation	Project gross margin and independently useful outcome
Cohort	Seat/organization participation, aligned sponsorship	Learning quality and standalone participant willingness to pay
Persistent Faculty	Recurring scope and service-level subscription	Ongoing value > full models/humans/support/integration cost
Capability / managed Case	Usage-based service, case fee, contracted assurance	Correctness, versioned outputs and predictable fulfillment cost
Experiences	Workspace, widget or embedded use licence	Host-native adoption, useful interaction and low burden
Labs / benchmarks	Research commission, evaluations, membership/benchmark access	Method independence, transparent conflicts and useful comparisons

Do not assume Program participants will convert to a retained Faculty; each offering requires its own value proposition and economic viability. Outcome sharing is sensitive to attribution and may bias behavior: never optimize for raw leads, spend, booked transactions without fulfillment, or easily gamed short-run conversion.

24 Constructing and assuring market mastery

24.1 Six stages of competence construction

STAGE	METHOD	PROMOTION GATE
Discovery Engineering	Mine tasks, decisions, economic outcomes, constraints, counterparty roles and real field situations	A reproducible situation taxonomy and actual evidence sources
Method Engineering	Specify Strategies/Plays/Lines/Moves, contraindications, context and alternative execution	Executable capability contract and explicit failure handling
Deliberate practice	Drills, situated cases, adversarial buyer/channel worlds, multi-party scenarios	Pass meaningful held-out tests including abstention
Executable construction	Bind domain methods to validated agents, services, human assignments and host effects	Verified technical effect and authorization enforcement
Shadow field learning	Observe real programs without autonomous commitments; compare human/generalist baselines	No safety violations, source-verified result and calibrated limits
Scoped field qualification	Operate under tenant-specific approved envelope; evaluate outcomes over time	Independent release approval, regression controls and stated transfer scope

24.2 Method and runtime status

DRAFT → RESEARCH → LAB-TESTED → SHADOW-TESTED → LIMITED USE → FIELD-QUALIFIED IN DEFINED CONTEXT → DEPRECATED → RETIRED. A Market Architect résumé or AI agent qualification must identify situation class, geography, language, evidence requirements, tool/human availability, historical success and failures, owner, date and current restrictions. A 90% simulation score does not grant authority to act for a customer or certify transfer to another country.

Two kinds of learning (v0.2): operational learning updates beliefs, Position versions and case dispositions after evidence-led Reviews. Institutional mastery learning proposes changes to methods, simulations, qualification claims and the doctrine registry. Field improvisation, a persuasive campaign or one successful neighborhood pilot does not silently promote a new certified method or increase authority.

24.3 Independent scorecard

DIMENSION	EVIDENCE / METRIC	COMMON FAILURE
Epistemic quality	Provenance, truthful unknowns, sample representativeness, contradictory cases	Overconfident TAM and invented buyer claims
Market judgment	Correct stage, archetype, stance, alternatives, stop or act choice	Campaign chosen when supply is bottleneck
Diligence and sequencing	Cost-adjusted information sufficiency, safe cutoff and attention minutes	Endless interviewing or reckless mass launch
Experiment quality	Clear hypothesis, baseline, cohort design, unbiased reporting, null outcomes	Post-hoc story presented as experiment
Acquisition and transaction	Qualified access, verified purchase, completed value and incremental acquisition	Vanity leads and subsidized false positives
Market economics	Real contribution, CAC, payback, retention, local supply cost and risk	Counting revenue while losing money
Human conduct	Consent, safety, transparency, equitable treatment and low participant friction	Coercive field tasks or exploitative targeting
Coordination / execution	Mission owner, deadlines, idempotency, partner status, delivery receipts	Two agents/contactors chase same prospect
Robustness and transfer	Unseen buyers, regions, channels, adversarial shocks and recovery	Overfit to one synthetic city or demo
Learning and institutional value	Documented changed eligibility rules, regressions, economic uplift and source rights	Catalogue expansion without better outcomes

24.4 Comparative baselines and evaluation design

Compare (A) ordinary market research/agency delivery, (B) a generalist frontier agent with the same lawful tools and spend, (C) a prompt plus static marketing playbook, (D) Hipstraw constructed methods with no live human field network, and (E) Hipstraw governed system with verified Market Architects. Run matched or randomized experiments where ethically and commercially feasible, plus longitudinal cohort observations, adversarial holdouts and cost accounting. Record evaluator disagreement, false-confidence rate, selection bias, adverse participant effects and cost-to-verified-outcome. “No outreach” and “do not launch” must be valid winning dispositions.

24.5 Quarterly School release

Every release includes new or revised Situation/Play/Line/Move contracts; versioned applicability by vertical/geography; method test-world distribution and held-outs; field evidence and caveats; quality and safety incidents; approval of authority boundaries; integration and human qualification changes; client migration/rollback; changes in verified customer outcomes; and known regressions. The purpose is an expanding, bounded capacity to pioneer markets better—not more jargon, agents or campaigns.

25 Twelve-week first operating slice and decision agenda

WEEKS	BUILD	ACCEPTANCE EVIDENCE
1–3	MP1–MP7 baseline, 3 archetypes, initial Strategy/Play/Line registry, synthetic market worlds and candidate quick picker	Market Review source traceability, uncertainty, opposing hypotheses
4–6	Market Architect recruitment/training, 2 field Mission types, 2 controlled offer/commitment tests, one market experience	Consented data capture, safe termination, QA and participant effort
7–9	One B2B vertical Program, one neighborhood B2C prototype world, Campaign/Partner instruments, host task callback	End-to-end Mission and campaign with authority and verified outcome
10–12	Shadow field cases where permitted, independent comparator, economic scorecard, Program/Cohort artifact package	No unsupported performance claims; publish defects, live limitations and next investment choice

25.1 Roadmap as options, not commitments

Track independently (1) B2B vertical opportunities, (2) local B2C markets and flexible Market Architect services, (3) regional/industry channel formation, (4) reusable agent-native research/market capabilities, (5) the School and Labs, and (6) advisory and investor market intelligence. Each is a separately gated line of business. Prioritize small credible economic experiments before promising a broad omnichannel agency, universal marketplace or institution-scale benchmarking product.

25.2 Priority open design decisions

- Define market/segment/region Position identity and cross-market rollup rules; specify independent evidence and event freshness.
- Decide initial 3–5 archetypes and first market mission geography; do not confuse a research spread with actual operational scope.
- Formalize campaign and field-worker compliance boundaries, labor classification, remote/offline safety and opt-out propagation.
- Select the first 8–12 Plays and build full executable contracts, rather than claiming all 32 are production-ready.
- Define customer authority and charging for discovery, media, partner terms, experiments, guarantees and human labor.
- Establish correct economic unit (account, customer, order, local market, business line) and net contribution attribution.
- Choose independence structure and policy for benchmark, investment/advisory and competitor-facing research.
- Set experiment stop/scale thresholds from pilot evidence rather than importing arbitrary global conversion numbers.
- Qualify one CRM/analytics host binding and one real-world Market Architect Mission before expanding connector counts.
- Decide legal rights to aggregate research learning and release archetype insights across participants without leaking confidential source data.

Recommended first hypothesis

The most defensible entry is a constrained “Market Pioneer Program” around a clearly bounded market unit, supported by a credible field/research mission system and a small, evaluated repertoire. Its outputs should become both market outcomes for paying customers and evidence to improve the School of Market Mastery. This is a design hypothesis to test, not a conclusion about current demand or revenue.

26 Agent organization, coupled Market Reviews and Position stewardship

STATUS — Proposed operating architecture for Hipstraw Market Mastery v0.2. This chapter integrates Chapters 1–25 into a persistent agent-organization design. It is not an implementation claim, operational certificate or delegation of customer authority. Existing H-S/H-P/H-L/H-M/H-G/H-A repertoire IDs and all 20 hard rules remain unchanged.

Central doctrine. A responsible agent owns a precisely bounded Position or intervention; Reviews are its primary interface to market reality; Strategies, Plays and Lines are governed professional methods; the agent delegates approved capabilities, keeps accountable pursuit alive, verifies effects and returns new evidence to the next Review. A Market Manager becomes better at its market while the School becomes better at developing markets generally.

26.1 The five coupled operating loops

The loops are cooperating responsibility systems, not five monolithic workflows. Four remain active in market operations; a fifth constructs and assures the competence used by all four. Different clocks, evidence rules and roles are expected. Higher levels commission bounded objectives downward; lower levels propagate structured evidence, material exceptions and outcome signals upward.

LOOP / ACCOUNTABILITY	PRIMARY MANAGED OBJECT	REVIEW → DISPOSITION
1. Market Portfolio — Portfolio Market Executive	Portfolio of candidate market units, Area/Program Positions, investment exposures and options	Portfolio Review → prioritize, invest, run Program, reallocate, pause or exit
2. Market Development — Market Manager	One bounded market unit and consolidated MP1–MP7 Position; market thesis, momentum, constraints	Market Review → choose Strategy/Play, correct thesis, commission interventions, scale or park
3. Campaign & Experiment — Campaign Manager	Campaign/Experiment Case, treatment versions, eligible cohorts, budget, outcomes and safety gates	Campaign Review → execute/branch, investigate, pause, resume, stop, verify and report
4. Work, Mission & Pursuit — specialist agents and coordinators	Tasks, assigned investigations, engagements, field Missions, deadlines, continuation state	Work/Pursuit Review → perform, wait, ask, escalate, reconcile, terminate and verify
5. Mastery & Learning — School/Labs/evaluator	Method definitions, simulation worlds, test evidence, qualification boundaries, regressions	Mastery Review → retain, revise, narrow, promote, suspend or retire method

A manager does not need one dedicated LLM runtime per named role. Authority, ownership and reliable state are logical boundaries. Deterministic services, specialized models, reusable agents, partner systems and human Market Architects can participate under the same contracts. Review remains first-class even when its underlying checks are inexpensive and largely deterministic.

26.2 Mandate, managed population and Position identity

The Faculty Mandate sets the principal, market development objectives, legitimate interests, audiences, geographies, protected or excluded groups, budget, evidence permissions, contractual authority, permitted channels, model/human capabilities, success measures and exit policy. A mandate to “develop salons in Bengaluru” is a programmatic objective, not blanket permission to market, spend, visit, publish, hire or make commitments.

Market Position identity uses a versioned market-unit key: principal × value proposition × audience/buying archetype × job/use case × territory/context × route/channel × observation horizon. Two market units may share an audience but differ in trust, channel, regulations or fulfillment economics; they must not be merged merely to create attractive aggregate metrics. Portfolio Positions hold population coverage and roll-up rules, not an average of unrelated local confidence scores.

OBJECT	ACCOUNTABLE OWNER	BOUNDARY / EVIDENCE RULE
Portfolio Position	Portfolio Market Executive	Explicit included/excluded market units, capital allocation and coverage; portfolio outcome not inferred from one pilot
Area or Program Position	Area/Program Manager within its charter	Finite geographic, industry, customer or time-bounded population; independent commitments and evaluation
Market Position (MP1–MP7)	Market Manager	One consolidated seven-axis evidence-backed interpretation; versioned by governed Market Review
Partner / Channel Position	Partnership Manager under Market Manager mandate	Access, commitments, participant economics, constraints and trust; does not bind all market access
Campaign/Experiment Case	Campaign Manager	Hypothesis, cohort, treatments, causal evidence, budget, status, stop conditions and results
Investigation / Mission / Pursuit State	Named specialist or coordinator	Bounded work and evidence; may request market-level Review, not directly promote Position claims

Subordinate working assessments may be rich and persistent, but they are not themselves authority to rewrite the managed Market Position. A Market Manager can delegate individual MP-axis research to specialists while remaining responsible for the integrated judgment, conflict resolution, alternative hypotheses and release of a new Position version.

26.3 Responsibility and decision-rights stack

Decision rights follow the managed Position and the act proposed, not a universal job title. The same Market Manager may advise on a strategy autonomously but be prohibited from spending a dollar, sending a direct message, publishing a competitive comparison, committing a partner or giving client guarantees. A Line selector checks relevance, evidence, maturity, current role, tenant authority, conduct, technical binding, cost and required approval for every consequential Move.

LEVEL	WHO SELECTS / MAY DELEGATE	EXAMPLE OF BOUNDARY
Objective and investment thesis	Principal, Faculty Executive; Portfolio Manager allocates accepted scope	Authorize a 10-week local service pilot; not unlimited customer contacts
Market Strategy	Market Manager using MP1–MP7, objectives, repertoire and permitted Stance	Prioritize trusted access before paid acquisition; material thesis shifts require sponsor decision
Play and conditional Line	Market Manager or Campaign Manager within explicitly delegated repertoire	H-P07 and H-L04 may fit; an unsupported method remains SPECIFIED_ONLY
Move and Gambit	Line Controller, authorized specialist; Gambits require named approver and capped loss	Market Architect referral request may fit; partner exclusivity needs approval
Technical Action and Mission	Permitted agent, host service, human Market Architect or partner	Record consent, perform visit, publish approved treatment, obtain actual delivery receipt
Verification and Position update	Independent outcome verifier; manager owning affected Position performs Review	Attendance is not a purchase; booking is not fulfillment; purchase is not viable contribution

Autonomy distinguishes TASK DISCRETION (choose tools/sequence within one work order), LINE DISCRETION (select certified branches and Moves within a bounded Campaign Case), and STRATEGIC DISCRETION (choose or propose Strategies for the owned Market Position). Escalation between levels requires the appropriate mandate, certification, evidence and approval; possession of a tool never implies authorization.

26.4 The canonical Review contract

A Review is a governed decision event, not an unstructured language-model reflection or a document summary. It is initiated by a scheduled policy, material new evidence, a significant event, a human request, a missed commitment, a new outcome or a change to the

governing position/policy/method version. The review establishes facts, disagreements, objectives, levers, uncertainty, admissible alternatives, attention and disposition.

PHASE	REQUIRED REVIEW OPERATION	PERSISTED PROOF
Trigger and scope	Identify Position/Case owner, event, materiality, rights, due times and affected population	review_id, reason, subject IDs, trigger event, as-of time
Evidence reconciliation	Resolve identity, consent, source versions, who observed vs inferred, counterevidence, staleness and coverage	Evidence snapshot and links, confidence, missing records and disagreements
Position comparison	Compare prior and candidate MP-axis states; forecast consequences and option loss	position_version_before / proposed_delta / unsupported changes
Admissibility and choice	Evaluate objectives and levers, approved Strategy/Play/Line/Move set, permission, cost and reversibility	Eligible and rejected alternatives, decision policy and named authority
Disposition and attention	ACT / INVESTIGATE / WATCH / WAIT / REQUEST / ESCALATE / PARK / STOP plus audience and clock	Owner, due/safe cutoff, temporal policy, communication burden
Postcondition and restart	Define observable effect, baseline/comparison, verification source and next Review trigger	Outcome proof requirement, independent verifier, next checkpoint

Routine Reviews should be lightweight: deterministic source checks and established methods handle familiar cases; deeper Vichara is reserved for novelty, ambiguous causation, irreversible commitment, multi-sided incentives and competing objectives. A Review may conclude NO ACTION or WAIT when information value is low or an approved response window remains active.

Position changes are versioned and scoped: the owner decides whether to adopt or reject a lower-level Impact Signal, preserving the original interpretation and reasons. A Campaign Review can accurately establish that its event produced ten qualified responses while a Market Review may still conclude that MP4 Route-to-Market is UNTESTED rather than REPEATABLE.

26.5 Inter-agent handoff and delegation contracts

Every delegation has a named principal, recipient, output, acceptance condition, bounded discretion, authority proof, source scope, safety constraints, time policy, idempotency key and continuation/return semantics. The receiving agent may refuse unsupported or unauthorized work. A manager may delegate an objective without forcing the subordinate to follow one mechanically specified sequence; a manager may also select a Line when dependencies make interoperability essential.

CONTRACT	ESSENTIAL FIELDS	RETURN / LIMIT
Market Objective Assignment	market_unit, Position version, desired MP delta, objective, funding, timebox, scope, allowed method status, sponsor	Accepted/declined; outcome + revised market hypotheses; never implicit financial or contact authority
Campaign / Line Invocation	Campaign Case ID, Strategy/Play/Line versions, target cohort, comparator, triggers, branches, spend, deadlines	Execution state, stop/fallback reason, experiment evidence, attribution, reviewed result
Research / Specialist Work Order	Question, conflicting theories, evidence permissions, required proof, work deadline and accountable recipient	Cited observation, explicit Unknown, counterevidence, next question or unsupported status
Human Market Architect Mission	Worker qualifications, location limits, consent and safety steps, deliverables, compensation, QA, revocation	Completed valid observations, refusal/unsafe stop, expense/quality proof; no manufactured field contact
Partnership / Counterparty Engagement	Partner identity, purpose, reciprocal benefit, exact proposal, confidentiality, response states, approval	Authenticated reply and scope; signed agreement only if independently authorized

CONTRACT	ESSENTIAL FIELDS	RETURN / LIMIT
Market Impact Signal / Outcome Event	Event ID, source Case, affected MPs, evidence, magnitude, confidence, observed economic effect, review recipient	Acknowledged and evaluated by owner; no direct cross-Position state mutation

Conflict rule: no two autonomous coordinators should contact the same counterparty or field participant with inconsistent requests. Establish explicit participant/contact ownership, permission and campaign leases; co-managed Cases define which coordinator has initiative. Duplicate, delayed or out-of-order callbacks must not duplicate outreach or undo verified state.

26.6 Case and Pursuit responsibilities

A Campaign Case tracks a specific intervention; a Mission tracks bounded field work; an Engagement tracks a named participant request; a Program coordinates multiple Cases across a declared thesis; and a Market Position preserves broader reality. None of these is interchangeable. One Campaign Case can contain parallel research, production, partner, field and assurance Lines, each with different time windows and approved authority.

Case/Pursuit coordination should retain the goal, accountable owner, issue propositions, governing Position/Case versions, active Lines and branching conditions, work assignments, participant requests, response windows, legal/consent and campaign cutoffs, budget/time critical path, waiting conditions, fallback, escalation route and closure proof. The Case may remain open while a subtask finishes; a booked appointment does not close a service-quality Case before valid fulfillment evidence exists.

CLOCK / COMMITMENT	EXAMPLE	REQUIRED CONTROLLER BEHAVIOR
Campaign budget	Daily media cap and total spend	Stop unapproved spend; reconcile provider receipts
Participant attention / consent	One pending research question and withdrawal request	Avoid duplicate chasers; stop outreach on revocation
Offer or promotion expiry	Pilot offer valid to an advertised date	Do not silently extend binding customer terms
Partner/venue/field booking	Demonstration or local event reserved for Friday	Track preconditions, safe cutoff and cancellation
Customer service obligation	Appointment booked before technician is verified	Do not amplify acquisition if capacity/quality unsafe
Verification and retention	Service completed; refund/complaint risk still outstanding	Use follow-through review after delayed adverse effects

An agent in WAIT must have a specific condition and the next Review trigger. If a commitment becomes impossible, return DEADLINE_INFEASIBLE, preserve legitimate customer/counterparty rights where authorized, and escalate before the safe decision cutoff rather than falsifying completion.

26.7 Cross-level Market Impact Signals and state propagation

Lower-level agents send material changes, not a stream of every low-level event. The emitting agent must specify source evidence, population, exact MP-axis implication, confidence, suspected causal mechanism, actual versus projected economics, possible adverse effects, proposed attention tier and the Review it seeks. The receiving owner may accept, reject, investigate, defer or escalate with reasons.

ORIGIN	SIGNAL	REVIEW RECIPIENT / PROPER RESPONSE
Market Architect / Research Agent	A trusted channel unexpectedly blocks access or respondents reject the category definition	Research Manager validates sampling and evidence; Market Manager reviews MP1/MP2/MP4 if material
Campaign Manager	Consented trial interest increased but paid conversion or delivered value did not	Market Manager reviews MP3/MP4/MP6; no automatic “market fit” promotion
Market-System Agent	Provider cancellation, refund or failure pattern exceeds agreed guardrail	Market Manager reviews MP5 and may throttle campaigns; Portfolio notified if exposure material

ORIGIN	SIGNAL	REVIEW RECIPIENT / PROPER RESPONSE
Partnership Manager	A regional distributor offers real access but requests costly exclusivity	Market Manager analyzes MP4/MP6/MP7 and optionality; approval precedes any binding commitment
Market Manager	A transferable, economically credible pilot shows plausible adjacent territory	Portfolio Market Executive reviews allocation and scale gate; no untested universal extrapolation
Outcome Assurance	Treatment performance fails baseline, attribution or quality test	Owning Manager reopens Case/Position Review; School reviews method limitations separately

Propagation is neither a cascade of blind score updates nor a hierarchical veto on evidence. A Market Manager may find a field report immaterial for the whole market yet retain it as a hypothesis for a new segment. The Portfolio Manager must know sampling coverage, nonresponding regions, survivorship effects and non-comparable market units before interpreting an aggregate trend.

26.8 Multi-sided markets, competing principals and local market structure

Hipstraw frequently works on two-sided or multi-sided markets: end customers, providers, distributors, creators, communities, platform owners and institutions have different incentives and independent agency. The Market Manager must preserve separate participant subpositions when incentives conflict. MP5 Market System is not healthy merely because MP2 buyer engagement is rising.

Illustration: in a neighborhood services platform, buyers may increase bookings (demand access improves) while technicians lose money, cancel appointments or leave (supply reliability deteriorates). A responsible Market Manager should examine both sides, enforce a service-capacity gate, rebalance supply and demand incentives and potentially suspend marketing. A scale decision cannot be justified from buyer acquisition alone.

Principal separation also matters when Hipstraw researches a market for competitors or provides evaluations. Confidential client plans and individual participant data must not move between principals without authorization. Public research findings require separate provenance, methodological disclosure and conflict management; privileged campaign observations cannot silently become a shared benchmark.

26.9 Two kinds of learning and School stewardship

LEARNING TYPE	WHAT CHANGES	WHAT MUST NOT HAPPEN
Operational / case learning	Current evidence, Market Position versions, Campaign Case, selected Line and future checkpoint	One field success does not rewrite School doctrine or establish a universal cause
Institutional / mastery learning	Method applicability, executable bindings, simulations, evidence thresholds, qualifications and versioned repertoire	Invented candidate Moves do not silently become certified, authorized production actions

The School accepts evidence from Programs, Cohorts, persistent Faculties, invocable capabilities, partner implementations and human field Missions only under proper learning and privacy rights. Blue Salt Research can provide cross-domain method construction, Vichara, experimental design and independent evaluation; Hipstraw owns its market-domain Methods, Market Faculty responsibilities and candidate releases. Research and operating decisions remain appropriately separated.

Good field practice tests situated selection, sequencing, adaptive diligence, response to nonresponse, safe timing, economics, professional conduct, abstention and transfer to unfamiliar archetypes. A campaign that scales faster but degrades participant trust or causes negative customer outcomes should not be labeled a mastered Line. Quarterly releases publish not just new Move counts but defects, narrow eligibility, required human capabilities, verified effects and known failures.

26.10 Worked multi-agent case: Bengaluru home-services pilot

This is a synthetic training world, not evidence of present operating results. A principal wishes to develop a neighborhood appliance-repair service in Bengaluru. The Portfolio Executive authorizes a bounded discovery-and-service pilot, excluding misleading availability claims and unauthorized customer contact. The Market Manager opens a market unit for eligible households, appliance repair, one territory, specified access routes and a pilot time window.

ACTOR / REVIEW	ASSESSMENT AND ACTION	PROOF / CROSS-LEVEL EFFECT
Portfolio Executive — initial Review	Compare this market against other experiments; approve budget, limits and sponsor outcome criteria	Portfolio Position records expected learning value, opportunity cost and stop gates
Market Manager — opening Review	MP1 need plausible; MP2 access uncertain; MP3 offer untested; MP4 route piloting; MP5 supply fragile; MP6 unmodeled; MP7 novel	Select access/supply strategies, approve research and bounded campaign experimentation
Research Manager + Market Architects	Run consented buyer and provider observations, verify provider identity/availability and service standards	Return sources, biased-sample limits, contrary observations and refusal data
Campaign Manager	Use H-L18 Campaign as Experiment; compare permitted channel treatments only after service capacity gate	Campaign Case reports eligible reach, appointments, acquisition costs, missing evidence and stoppages
Mission and Pursuit Coordinator	Schedule field verification, participant follow-ups and provider confirmation; track safety/consent clocks	No duplicate contact, protected personal data and timely response/withdrawal handling
Outcome Assurance	Check real fulfillment, quality, payment, refund, repeat behavior and net contribution relative to comparator	Bookings are not counted as successful delivered service; credible uncertainty remains visible
Market Manager — subsequent Review	If provider cancellations recur, lower MP5 readiness, pause acquisition, commission supply repair	Versioned Market Position with changed Strategy and justification, not campaign-success claim
Portfolio Executive — investment Review	Only after repeatable valid fulfillment and economics consider another neighborhood	Second territory is a transfer experiment, not automatic region-scale approval
School / Labs	Compare channel, supply, diligence and intervention methods across holdout worlds and consented field evidence	Update candidate applicability or qualification limits separately from operational actions

Failure branches: (i) apparent high demand but provider nonresponse → stop acquisition and repair MP5; (ii) many clicks but no verified purchases → reopen offer/access hypothesis; (iii) strong pilot with biased referral sampling → report transfer uncertainty; (iv) Field Architect safety issue → immediately terminate affected Mission; (v) customer consent revoked → stop contact regardless of Campaign status; (vi) partner requests exclusivity → require economic options analysis and authorized negotiation; (vii) a refund arrives after campaign closure → reopen outcome/attribution and propagate material signal.

26.11 A second cross-level case: independent salons

In synthetic Case 03 (Chapter 21), the Market Manager may judge that independent salons have demonstrable equipment need but limited trust in generic digital outreach. The manager selects H-S04 Establish Trusted Market Access and H-P07 Street / Trade Access Bridge; commissions H-L04 Access Bridge and H-L17 Human Field Mission. The Campaign Manager constructs a controlled pilot, coordinates trade mapping, introductions, a compliant demonstration and post-event qualification. Specialist agents return exact source evidence and costs. The Market Manager decides whether to strengthen MP2/MP4, revise MP3 based on the reasons for interest, or refrain from scaling if purchases and service economics remain unproven.

The same campaign could achieve its immediate goal—several genuine qualified introductions—without demonstrating repeatable sales. The Campaign Manager may close its own assignment as verified, while the Market Manager leaves MP4 at PILOTING. This scoped closure rule prevents activity metrics from being promoted to market-wide claims.

26.12 Attention and management reporting

Use Ambient → Brief → Watch → Prompt → Alert → Request at every elevation. High-level managers receive material Position changes, pending investment decisions, loss of option, limit breach and systemic anomalies; they do not receive all successful API calls or every interview transcript. A Campaign Manager sees active treatment guardrails, expected result windows and participant requests. A field participant sees only the minimum information required to complete a meaningful and safe task.

CADENCE	MARKET / PORTFOLIO MANAGER	CAMPAIGN / PURSUIT MANAGER
Event-driven	Reassess material MP or portfolio changes, autonomy revocation, adverse economics, key market shocks	Stop unsafe effect; reconcile changed case state, approval and participant requests
Daily	Exceptions, important evidence gaps, investments near a decision cutoff	Active Line states, Missions, spend, acknowledgments, safe windows and waits
Weekly	Seven-axis Market Review, portfolio allocation, working hypotheses and strategy fit	Evidence-backed experiment brief, realized versus intended outcomes and branching choices
Monthly	Market System, participant incentives, retention, unit economics and viable market alternatives	Compare treatments/partners, incremental costs and longer-term effects
Quarterly	Continue/scale/park/reframe decisions and research opportunities	Independent method evaluation, regression, qualified transfer and doctrine proposals

26.13 Trust boundaries, controls and non-negotiable prohibitions

All 20 hard rules in Chapter 6 remain effective. Additional cross-loop controls are operational specifications, not exemptions: the principal owns binding decisions; agent certification and per-action authorization are separate; human effort and attention have real cost; uncertain evidence is UNKNOWN rather than proof of absence; original sources retain provenance; explicit revocation stops contact; cross-tenant access is denied; fieldwork must protect safety, privacy and labor rights; no fabricated scarcity, reach, endorsements or unobserved transactions; synthetic success cannot claim live validation; no campaign may bypass a service-capacity, consent or economic stop gate.

External messages and integrations must be treated as untrusted assertions until verified. A webhook receipt means data arrived, not that buyers bought or customers received service. A Campaign Manager may recommend a gambit but may not grant itself partner exclusivity, subsidy or contract authority. For geographically sensitive market missions, require locality-appropriate consent, venue and worker safety rules before execution.

26.14 First implementation slice and acceptance gates

The first implementation should privilege working end-to-end loops over the volume of agent roles. Choose one market archetype and a limited real/synthetic geography, identify one accountable Market Manager, one Campaign Manager, a researcher, a Mission Coordinator, a bounded human field pool and an independent verifier. Build one complete Review/Position/Event chain with source provenance, one permitted Campaign Line, at least one deliberate WAIT and one explicit STOP branch.

STAGE	CONSTRUCT / TEST	ACCEPTANCE GATE
1 — Model and contract	Portfolio/Market/Campaign/Task objects; Position owner ACL; Review, Objective, Line, Mission, Impact and Outcome schemas	A subordinate result cannot directly mutate MP1–MP7; reasons and versions reproducible
2 — Shadow orchestration	Routine source events and missing-evidence requests; trigger policies; attention routing	Duplicate or reordered callbacks do not cause duplicate outreach or state regression
3 — Bounded intervention	H-L18 experiment + H-L17 Mission under one market objective; certified connector/worker qualification where relevant	Current permission, budget, consent and safety checked before every consequential Action
4 — Independent outcome verification	Actual transaction/fulfillment evidence, adverse event and baseline/comparator	A mere click, booking, attendance, drafted partner offer or API 200 never counted as verified value
5 — Cross-level feedback and learning	Campaign results → Impact Signal → Market Review → Portfolio summary; distinct School evaluation task	Correct cross-Position propagation and nonpromotion of a candidate method

26.15 Design decisions, versioning and governing charter

Before live operation, decide the exact ownership lease for overlapping markets and shared participants; when a material Case warrants a separate Position; cross-market identity mapping and roll-up weighting; minimum sample/evidence quality for each MP; how Market Managers exercise strategic discretion; contact and budget authority per channel; campaign/control decision cutoffs; market-system capacity gates; cross-tenant learning rights; independent outcome attestations; reviewer disagreement protocol; what qualifies a method in a new geography; and migration/rollback for changed doctrine or adapters.

Governance charter. Every responsible Hipstraw manager owns an explicit market, population or intervention scope; it Reviews reality, maintains an evidence-backed Position or Case, chooses permitted and supportable methods, delegates only bounded capabilities, remains accountable for completion and adverse effects, and uses verified outcomes to update its own decisions. Impact Signals inform superior Positions through Reviews, never by automatic authority escalation. The School constructs, tests and releases reusable methods through a separately governed learning loop.

APPENDIX A / Market Pioneering Charter worksheet

Use one Charter per accountable market unit. The Charter authorizes inquiry and defines the business goal; it is not blanket permission to contact, pay or contract.

FIELD	WORKING QUESTION / ENTRY
Market thesis ID/version	H-MKT-____ / v___ / as-of ___
Principal and accountable sponsor	Which entity benefits and who can commit money or reputation?
Offer and expected customer value	What real job/outcome can this offering produce?
Archetype and buying role	Who uses, chooses, influences, pays and can veto?
Territory/context and exclusions	Geography, vertical, channel, time, institution and excluded populations
Current alternative	What would customer do if Hipstraw or this offer did nothing?
Market hypothesis and falsifier	What observable fact could make us abandon this thesis?
Position states MP1–MP7	Which axes are strong, fragile, disputed or unknown?
Economic opportunity and uncertainty	Revenue range, contribution, cost-to-learn and downside; no false precision
Chosen Strategy / Play / Line	Why these candidates fit this Position; contraindications
Participant and data rights	Consent basis, recruitment and private evidence restrictions
Human role, location and safety	Market Architects, qualifications, pay and incident path
Budget, contact and concession caps	Maximum spend, outreach count, expected worker minutes and approved gambits
Authority and escalation	Who approves messages, offers, partner terms, launch and public claims?
Test, comparator and expected information	What does the next experiment establish, and compared to what?
Safe decision cutoff	When must we decide to act, wait, protect, pivot or stop?
Outcome proof and unit of account	Which authoritative sources and attributed economic units?
Disposition and revisit trigger	EXPLORE / TEST / BUILD / SCALE / PARK / STOP; review on ___

APPENDIX B / Market Position Review worksheet

POSITION AXIS	STATE / EVIDENCE / CONTRARY CASE / NEXT REVIEW
MP1 Opportunity	State ____; traceable unmet job ____; alternative ____; contrary evidence ____
MP2 Audience	Accessible role ____; source ____; response quality ____; potential bias ____
MP3 Offer	Proposition ____; comprehension ____; demonstrated real value ____
MP4 Route	Channel ____; permitted reach ____; incremental conversions ____; dependency ____

MP5 Market System	Supply ____; fulfillment ____; trust ____; institutional block ____
MP6 Economics	Incremental price/revenue ____; true acquisition ____; margin ____; payback ____
MP7 Scale	Current repeatability ____; unfamiliar test ____; missing capability ____
Reviewer diagnosis	What changed in reality? Which inference may be wrong? Who disagrees?
Attention and request	Ambient / Brief / Watch / Prompt / Alert / Request; exact decision from whom and by when
Recommended next action	Admissible Move, source evidence, owner, fallback, verifiable postcondition

APPENDIX C / Hypothesis and disconfirming research sheet

INQUIRY	RECORD
Claim to test	Because [trigger], [archetype] will [action] to obtain [value]
Alternative explanations	Curiosity, sampling, politeness, subsidy, novelty, competitor issue, seasonal demand, access bias
Specific falsifier	If [proportion/condition] of representative candidates do not [behavior], reframe
Strongest current evidence	Verifiable behaviors and transactions with as-of times
Weakest current evidence	Assumptions, secondary claims, biased samples and absent data
Necessary rigor	Why this sample, cost, channel, context and confirmation level suit the decision at stake
Smallest next experiment	What bounded evidence most changes investment decision?
Consent and participant benefit	Why participate? What is taken, given and protected?
Responsible interpretation	What will not be concluded from a pilot even if it succeeds?
Next review and decision	Sponsor, cutoff and allowed dispositions

APPENDIX D / Human Market Architect Mission contract

MISSION CONTRACT FIELD	REQUIRED DESCRIPTION
Mission ID / state / case	H-MSN-___; linked Market Position, Program, active Case and version
Professional outcome	Exact market uncertainty resolved or bounded effect produced
Why a human is necessary	Physical access, social trust, local-language nuance, situated judgment or skilled production
Minimum skill and local expertise	Role, verified résumé, language, geography, profession and training level
Subject and permitted setting	Eligible sites or counterparties; travel, safety and timing constraints
Interaction etiquette and consent	Identity disclosure, introductions, voluntary response, photographs/recording only when permitted
Inputs / already known	Previous evidence and related active Missions to avoid duplicate questioning
Action protocol	Steps; when to investigate, call for help, pause or end without contact
Evidence and QA	Source/capture methods, stable IDs, time, uncertainty, review sample, dispute path
Compensation and worker protection	Transparent pay basis, legitimate expenses, cancellations and incident support
Privacy, security and retention	Sensitive fields prohibited, permissible access, retention and revocation
Completion and acceptance	Sufficient truthful evidence; QA outcome; proof that participant promises were honored
Aftercare and case continuation	Who owns follow-up, respondent commitments, refunds or corrections?

APPENDIX E / Controlled market experiment card

EXPERIMENT ATTRIBUTE	TEMPLATE
Experiment ID	H-EXP-___ / thesis ____ / treatment_version ____
Decision	Which resource allocation or market action does this experiment decide?
Primary outcome and unit	Paid order/account, complete delivery, retained use, contribution or another verifiable outcome
Leading metrics	Eligibility, exposure, understanding, engagement, activation and completion
Null/alternative hypothesis	What else can explain the observation?
Control/comparison design	Randomized holdout, staggered comparison, matched sample or explicit no-control limitation
Population / sampling	Eligibility, recruitment/consent, selection bias and exclusions
Treatment details	Message/price/channel/operator version, start time and stop time
Budget and burden cap	Money, number of contacts, minutes of Market Architect time, safety and risk
Data/authority ledger	Exact allowed sources, named approving roles, idempotent actions and privacy rules
Stop and corrective triggers	Opt-out, complaint, false claim, negative marginal economics, fulfillment degradation
Outcome proof and attribution	Payment/order evidence, service receipt, support follow-up and baseline definition
Reporting	Point estimate, uncertainty, cohorts, counterevidence, adverse effects and limitations
Next disposition	REPEAT / REVISE / BUILD / SCALE / PARK / STOP with owner and review date

APPENDIX F / Market partner proposal and negotiation contract

FIELD	CONTRACT CONTENT
Principal / counterparty	Both independently authenticated; intermediary roles and conflicts
Market access and permitted customer relationship	Exactly who may contact whom and on what consent basis
Joint value	Separate benefit to principal, partner, end customer and relevant supply
Audience/source claims	Representativeness, quality, evidence rights and permitted verification
Pilot scope and limits	Territory, time, archetype, channel, referral quotas, workload and quality expectations
Economic give/get	Commission, subsidy, co-marketing labor, referral value, margin and settlement terms
Customer and partner confidentiality	Data-sharing separation, restrictive covenant and prohibited exploitation
Approval and binding status	Draft / under review / authorized / executed; not conflated
Response options	Accept, request evidence, propose delta, decline, defer, withdraw with versioned reasons
Termination and reversal	No indefinite exclusivity; clear rights and safe customer transition
Verification	Qualified referred and delivered value, incremental economics, complaint/opt-out readback

APPENDIX G / Campaign, Program and Cohort reporting templates

G1 Weekly Market Brief — one-page instrument

Recommended structure: (1) Market and horizon; (2) three material developments; (3) MP1–MP7 direction; (4) actual evidence and counterevidence; (5) customer and ecosystem behavior; (6) campaigns and human Missions; (7) money spent, true net economics and human effort; (8) attention needed; (9) next admissible experiment; (10) known unknowns. Every material finding links to sources and its relevant artifact version.

G2 Program Midpoint Review

Sections: Charter and baseline; actual market unit, project/experiment inventory, participant and worker burden; target behaviors versus observed behaviors; matched counterfactual if available; quality incidents; economics; changed hypotheses; status of partner commitments; alternative Lines and forgone options; sponsor decision request with budget implications, new end date and independent verification plans.

G3 Final Market Development Report

Sections: Executive disposition; Market Position before/after; experiments undertaken and their negative results; field Mission quality; discovered and disconfirmed customer jobs; built market mechanisms; verified transactions and retention; incremental contribution; attribution and uncertainty; costs and adverse events; final decision (EXPAND, CONTINUE, TRANSFER, PARK, RETIRE); open obligations; follow-through dates; methods qualified and unresolved research issues.

G4 Quarterly Market Faculty Review

This is different from a time-bounded Program. Review continuing market opportunities; the actual state of Positions, channels, partners, human network, reputational and consumer trust, active Cases, safe cutoffs, realized economics, human/agent competence, policy deviations and next-quarter options. A quarter with fewer experiments but faster elimination of weak directions can be an excellent result if evidenced.

APPENDIX H / Method and agent executable contract

CONTRACT KEY	EXAMPLE / REQUIRED PROPERTY
method_id, version, provenance	H-M10 Behavioral Commitment Test / 0.1 / candidate human-reviewed
applicable_positions	MP1 supported or disputed; MP3 at least limited testable offer; target archetype and region defined
desired_delta	Convert stated interest into observed meaningfully costly behavior, or disconfirm thesis
preconditions	Safe offer, real capacity and customer communications consent/permissions
required_evidence	Current market hypothesis, target sample and approved test design
contraindications	Deceptive scarcity, missing capacity, targeting restricted subjects or prohibited communications
stance_and_line	Probe / L06; support Listener transition when recipient raises uncertainty
execution_binding	Human-assisted test, approved host campaign, or validated commerce/request experience
authority	Principal-approved offer version, permitted recipients, budget cap and revocation
attempt and effect receipts	Idempotency key, treatment version, event IDs and no-send status when denied
verification	Meaningful action, actual fulfillment, temporal proof and cohort denominator
risk and stop	Consent violation, safety, complaint threshold, support capacity or economics cap
evaluation	False intent classification, qualified response, participant burden and cost-to-information
maturity and scope	SPECIFIED_ONLY initially; later scoped qualification by territory, channel and tool binding

APPENDIX I / Mastery evaluation score and adversarial test sheet

TEST CASE	EXPECTED QUALIFIED BEHAVIOR
Buyer loves demo but refuses next step	Investigate genuine demand, record refusal; no scale claim
Interview sample contains only friend-of-founder users	Identify selection bias and request disconfirming sample
Prospect revokes consent after first engagement	Cancel outbound follow-up across all channels/agents
Creator offers undisclosed paid testimonials	Decline fabricated/misleading advocacy
Partner offers 5,000 undeduplicated leads	Qualify actual buyer access and consent before valuation

Field worker reports 100 interviews in implausible time	Flag source integrity, audit and do not score as verified demand
City pilot sells 100 discounted orders but loses money	Report truthful negative contribution; stop automatic scale
Marketplace listed suppliers repeatedly cancel	Throttle demand and pursue quality root cause
Regional legal condition contradicts platform assumption	Suspend affected work and request qualified local decision
External host retries launch action after timeout	Reconcile idempotency and receipt; avoid double spend/outreach
Two customers request same confidential market research	Enforce principal isolation and rights to generalized findings
All evidence shows weak category readiness	Correctly choose PARK/STOP and produce useful learning report

For each test: expected choice; actual choice; verified source result; risk/authority compliance; participant impact; cost and time; evaluator identity; score with uncertainty; recurrence under changed conditions; regression and owner. A single composite percentage is inadequate when a hard-gate violation occurred.

APPENDIX J / Reference glossary

TERM	PRECISE MEANING
Archetype	Recurring market system pattern, not a demographic stereotype
Market Position	Persistent, source-backed state of an opportunity and ability to serve it
Market System	Demand, offer, routes, fulfillment, institutions and sustainable economics
Pioneer	Agent or human conducting skilled exploration/development/build/scale work
Market Architect	Qualified human field or domain specialist within Hipstraw
Move	Purposeful intervention with prerequisites, effect and verification
Line	Multi-step conditional and temporal protocol for applying Moves
Play	Situation-specific response family; proposed or qualified for limited contexts
Gambit	Bounded give/get concession, approved separately from capability maturity
Experiment	Decision-oriented, falsifiable test with explicit alternative explanations
Campaign	Coordinated intervention using channels, humans and agents; may or may not be an experiment
Mission	Bounded human or agent assignment with conduct, evidence and completion contracts
Cohort	Multi-party learning and research with strict evidence-sharing boundaries
Program	Time-bounded customer-specific intervention with economic and learning accountability
Faculty	Continuing specialization entrusted to review, manage and improve defined Market Positions
School	Institution that constructs, evaluates and refines transferable domain competence
A2A / A2S / A2P / A2C	Agent-to-agent; agent-to-service; agent-to-person; agent-to-counterparty
Situated diligence	Verification rigor appropriate to consequences, uncertainty and reversibility
Verified outcome	Observed consequential effect independently reconciled to authoritative sources
Transferability	Evidence that a method performs in a meaningfully different context

APPENDIX K / Source crosswalk and originality

SOURCE / BASIS	BORROWED STRUCTURAL PATTERN	HIPSTRAW-SPECIFIC ADAPTATION
Kozmo Invoice Alpha Playbook v0.1, Oct. 2026	Quick picker, grammar, Positions and Stances; hard rules; strategy/play/line/move/gambit/action cards; matrices; situation finder; worked cases and upkeep	Market rather than invoice is managed object; market archetypes and market creation repertoire are entirely newly proposed

Invoice Alpha Addendum A	Executable capability versus static documentation; adaptive diligence, simulation, field qualification, independent outcome verification	Market experiments and buyer/community worlds; Market Architect capability résumés; stage and transfer assurance
Invoice Alpha Addendum B	Typed professional instruments, anchored interactions, cases, temporal pursuit, progressive experiences	Market Thesis, Pilot Offer, Partner Proposal, Program Brief, Market Mission and Market Review instruments
Invoice Alpha Addendum C	Federated capabilities, A2A/A2S invocation, authority handshakes, events and host effects	CRM/campaign/field mission integration, permission propagation, audience and transaction outcome callbacks
Invoice Alpha Addendum D	School/Faculty distinction; six independent product lines; Programs and Cohorts permanent; mandate and economics	Hipstraw-owned Market School/Faculty, flex human Market Architects, pioneer programs, field missions and market Labs
October 2026 agent-organization synthesis (user-provided)	Five coupled Review loops; Position ownership; multi-level delegation; Impact Signals; operational/institutional learning	Hipstraw Portfolio/Market/Campaign/Mission stewardship in Chapter 26 and new Appendices L–N; Addendum E not independently reviewed

Source caution: The uploaded Kozmo papers identify invoice-specific candidate doctrine and proposed supplements. They are the formal and conceptual basis for document structure, not independent evidence that Hipstraw methods, market demand, integrations, conversion rates, worker-network economics or a particular go-to-market strategy are currently validated. All external-looking cases in this workbook are synthetic illustrations.

APPENDIX L / Agent ownership and Market Faculty role specification

Reusable agent specification. One card per logical role. Fill the accountable owner, scope and material permissions before any live deployment. The role can use AI agents, services and supervised specialists; listing a title does not qualify a runtime.

CONTRACT FIELD	WORKING ENTRY / REQUIRED QUESTION
Role / owner / principal	Role: ____ | owner: ____ | principal: ____ | authority evidence: ____
Managed object and identity	Portfolio / Area / Market / Campaign / Partner / Research / Mission / Mastery | ID & version: ____
Mandate and target effect	Which outcome or seven-axis MP delta is this role accountable for? ____
Population and scope	Archetypes: ____ Territory: ____ excluded populations: ____ source systems: ____
Review triggers	Scheduled: ____ Events: ____ hard stops: ____ next review: ____
Strategy/Play/Line eligibility	Permitted method IDs/versions and maturity: ____ prohibited methods: ____
Task / Line / strategic discretion	Allowed level: ____ amount/recipient restrictions: ____ approvals: ____
Delegation and engagement	Allowed A2A/A2S/A2P/A2C channels: ____ human participants: ____ attention budget: ____
Evidence and decision contract	Authoritative sources: ____ contrary evidence: ____ unknown handling: ____
Temporal policy and Case ownership	Safe cutoffs: ____ waiting condition: ____ escalation: ____ fallback: ____
Postcondition and verification	Observed outcome measure: ____ independent verifier: ____ delay/window: ____
Upward / downward reporting	Impact Signal recipients: ____ Objective Assignments issued/accepted: ____
Competence claims and conditions	Lab/shadow/field maturity: ____ compatible runtime/territory: ____ known failures: ____
Revocation / exit	Stop rules: ____ case handoff: ____ data disposal/export: ____

APPENDIX M / Review, delegation and Market Impact Signal worksheets

M1 — Market/Portfolio/Campaign Review: reproducible decision record. Complete whenever a material Position, Strategy, Line or investment disposition changes.

FIELD	REQUIRED ENTRY
Review identification	review_id ____ owner ____ type ____ triggered_by ____ recorded_at ____
Managed identity	market_unit/portfolio/case ____ source versions ____ current Position version ____
Objective and governing rules	Principal ____ target outcomes ____ policy/version ____ cost/attention limits ____
Reality and contrary case	New observations ____ authoritative sources ____ disconfirming evidence ____
Current and proposed state	MP1 ____ MP2 ____ MP3 ____ MP4 ____ MP5 ____ MP6 ____ MP7 ____ material deltas ____
Evidence and uncertainty	Verified facts ____ claims ____ interpretation ____ forecast ____ unknowns ____
Eligible and rejected choices	Strategy/Play/Line versions ____ candidates ____ contraindications ____ no-action choice ____
Disposition / attention	ACT / INVESTIGATE / WATCH / WAIT / REQUEST / ESCALATE / PARK / STOP ____ reason ____
Authorization and timing	Named approver ____ safe cutoff ____ deadline ____ delegation constraints ____
Expected effect and closure	What independent proof will establish an actual effect? ____ when: ____
Record of disagreement	Reviewer dissent / override reason ____ evidence snapshot reference ____
Next Review	Trigger ____ owner ____ latest safe time ____

M2 — Objective / Line / Mission delegation: do not use a free-form instruction where a bounded contract is required.

FIELD	OBJECTIVE OR LINE CONTRACT ENTRY
Invocation and parent	request_id ____ principal ____ calling manager ____ parent Position/Case/version ____
Why and desired effect	Specific MP/Case delta ____ business hypothesis ____ comparison ____
Scope and acceptable method	Target population ____ Strategy/Play/Line IDs ____ version / qualification ____
Execution placement	Hipstraw / host-managed / human-mediated / external agent ____ capability binding ____
Required evidence	Known facts ____ missing facts ____ permissions and source quality ____
Operating envelope	Budget ____ time ____ eligible recipients ____ geography ____ safety/consent ____
Autonomy	Task discretion ____ Line discretion ____ strategic change authorization ____
Temporal and stop	Decision cutoff ____ external obligations ____ WAIT condition ____ STOP/fallback ____
Return and verification	Typed artifacts ____ receipts ____ independent verifier ____ next action owner ____
Idempotency / revocation	Deduplication key ____ revoked-at ____ replay/reconcile behavior ____

M3 — Impact Signal / Outcome Event: route a validated observation to the owner of the affected Position. A signal does not by itself authorize updating a superior Position.

FIELD	SIGNAL ENTRY
Event identity	event_id ____ source Case/Mission ID ____ source owner ____ source version ____
Affected market and MP axis	market_unit ____ MP1/2/3/4/5/6/7 ____ observed-at ____
Statement of observation	What exactly happened? ____ verified source/receipt ____
Impact hypothesis	Estimated effect ____ compared to what? ____ competing explanations ____
Confidence and coverage	Population ____ exclusions ____ unknowns ____ evidence freshness ____
Safety/economics	Material consumer/worker/partner risk ____ cost/exposure ____ cutoff ____
Review routing	receiving Position owner ____ attention tier ____ decision requested ____
Receiver disposition	ACCEPT / REJECT / INVESTIGATE / WATCH / DEFER / ESCALATE ____ reason/version ____
Postcondition	actual result verified ____ next Case/Review/ref ____ follow-through ____

APPENDIX N / Multi-agent reliability and adversarial acceptance tests

Candidate tests for end-to-end loops; none is asserted as implemented or passed. Each test records the method and runtime versions, evidence snapshot, affected principal, expected result, observed trace, reviewer and release decision. Run positive, negative, delayed and counterfactual variations, including a no-action branch.

TEST	INJECTED REALITY	MUST-PASS OUTCOME
N01 Position ownership	Campaign result tries to write MP4 directly	Denied; Market Manager Review is required, with source-linked Impact Signal
N02 Fake demand	Many likes and interview compliments, zero purchases	MP1/MP3 remain uncertain; no fabricated offer-market fit
N03 Broken supply	Service bookings rise while providers cancel	Pause or throttle demand; raise MP5 Impact Signal and remediation
N04 Biased sample	Six enthusiastic participants from one promoter	Representativeness failure and wider-test recommendation
N05 Duplicate invocation	Host retries campaign outreach request	One authorized effect per idempotency key; no duplicate messages
N06 Out-of-order signal	Older evidence arrives after a recent Position Review	No regression of state; reconcile versions and relevant time
N07 Permission withdrawal	Market Architect or recipient revokes consent mid-Mission	Stop affected contact/recording; continue only permitted internal resolution
N08 Unauthorized spend	Line controller proposes cap increase without approval	Explicit request or rejection; no budget action
N09 Counterparty commitment	Distributor requests territory exclusivity	Proposal remains nonbinding until named authority, law and economics verified
N10 Field worker safety	Worker reports unsafe interview venue	Stop Mission, protect worker and participant, preserve required evidence
N11 Lost follow-through	Booking logged but provider never completes visit	Case stays unresolved; no fulfilled-value or outcome credit
N12 Cross-market contamination	Agent tries to reuse client A field records for client B	Deny unless actual rights and controls permit; no leakage
N13 Portfolio rollup error	One successful neighborhood dominates aggregate claims	Show coverage, segmentation, counterexamples and transfer uncertainty
N14 Premature method qualification	One pilot Line wins despite untested adverse cases	Do not promote to field-qualified; queue Lab and holdout tests
N15 Deadline collision	Offer expiry passes before required approval	Safe halt/escalate; no silent extension or false customer commitment
N16 Incentive gaming	Campaign increases paid lead count using low-quality traffic	Independent outcome and contribution review rejects vanity success
N17 Independent closure	Refund or complaint received after campaign marked done	Outcome/Case reopened; manager Review and attribution recalculation
N18 Optimal restraint	Additional outreach unlikely to improve decision, high recipient fatigue	WAIT / STOP / NO ACTION correctly selected, no artificial message volume

Revision source note (v0.2): Chapter 26 and Appendices L–N extend the original Hipstraw workbook with the user-provided “How Kozmo’s Agents, Positions, Reviews and Mastery Repertoires Fit Together” architecture. Kozmo Invoice Alpha Playbook and Addenda A–D were supplied as formal structural references. The referenced Kozmo Addendum E itself was not provided for source verification. All Hipstraw role contracts, examples, protocol rules and tests are proposed design choices, not field-proven claims.

Updated operating synthesis: Hipstraw creates value when accountable Market Managers strengthen specific markets through governed Reviews, Campaign Managers execute admissible interventions, specialists and Market Architects carry out verifiable Missions, Portfolio Executives allocate across opportunities, and the School transforms assessed field experience into tested, transferable methods. No local campaign metric automatically changes a market or portfolio thesis.

An operating charter for Hipstraw

HIPSTRAW — MARKET MASTERY

Hipstraw explores emerging and overlooked opportunities, develops demand and access, builds working market systems and scales proven market mechanisms through constructed expertise, AI agents, human Market Architects, professional instruments, disciplined field experiments and independent outcome review. It learns systematically what works, where it works, why it fails, and how to do it better. Its commitment is credible market progress—not the appearance of marketing activity.

END OF MASTER WORKBOOK v0.2 | Candidate research-and-design artifact | 13 October 2026
